

# Empower your media creativity.

Streamline Xchange is an award-winning asset management platform proven to arm some of the world's top media creatives with the best-in-class solutions to manage all their content. Combined with the rest of Ross' suite of products, it seamlessly integrates file-based workflows with signal-based infrastructures to offer single and multi-site operations global access to their content and workflows.

**Discover your assets**

Access your production assets and associated metadata in and out of your facility from a single, unified UI with powerful search capabilities and real-time playback.

**Accelerate Content Creation**

Simplify and accelerate your content creation and workflow by accessing media and workflows remotely.

**Add flexibility**

Archive and restore content to local and cloud-based archive solutions from any location and across multiple storage tiers.

**Improve efficiency and creativity**

Accelerate your entire media production workflow without compromising creativity or quality.

**Easy user management**

Manage large teams easily by delegating roles and managing project-level permissions.

**Future-proof your workflow**

Work with all major broadcast codecs and file formats with unparalleled flexibility and proven reliability.

**Creative Integrations**

Improve productivity by seamlessly connecting your video, graphics, and visual FX teams with tools to locate, manage, and import assets and projects without ever needing to leave creative tools such as Adobe Creative Cloud and Apple Final Cut Pro.

**Rough Cut Editing**

Easily gather videos into an organized rough cut while settings in and out points to prepare a creative story for exporting to playback systems or for creative finishing in Adobe Premiere Pro directly from a web interface.

**Time-based Logging**

Streamline Xchange MAM provides powerful metadata-tagging tools for logging live or pre-recorded video. These tools contain configurable user interfaces that enable content loggers to easily tag video with defined metadata, making assets easier to manage, automate, and monetize.

**Metadata Management**

Manage all your content with both asset-level and project-level metadata fields. Metadata can drive the discovery of assets and automate workflows to accelerate productions.

**Configurable workflows**

Drive and configure internal video production processes across multiple departments and improve the communication and response time of engineering and support staff.

**Archive Integrations**

Browse and edit archived assets by proxy and seamlessly restore the high-res file for final output. Streamline Xchange integrates your production storage with LTO or object storage solutions for dynamically managing archived content locally or from the Cloud.

## Recommended Servers

Database Server	Media Processing Server
Windows Server 2019 64-bit	Windows Server 2019 64-bit
32GB Memory	64GB Memory
Intel Xeon E-2144G 3.6GHz or higher	Dual Intel Xeon Silver 4214 or higher
2x480GB SSD SATA 6Gbps	2x480GB SSD SATA 6Gbps

## Editions

### Streamline Xchange Standard

**10** Web Users  
**6** Proxy Renders

### Streamline Xchange Production

**30** Web Users  
**10** Creative Users  
**12** Proxy Renders

### Streamline Xchange Enterprise

**50** Web Users  
**20** Creative Users  
**18** Proxy Renders
