

Real-time  
captioning  
for venues

# Live captioning for accessible, inclusive experiences

## Ensure every message reaches every guest

Whether delivering game-day announcements, event presentations, public information, or emergency messaging, organizations have a responsibility to communicate effectively with every audience member.

CapGo provides live, ADA-compliant captioning designed specifically for venues and public spaces, helping organizations improve accessibility, support compliance initiatives, and deliver more inclusive experiences without adding operational complexity.

## Accessibility isn't optional

Guests rely on clear communication to fully participate in live events and public experiences. For sports venues, arenas, convention centers, government facilities, educational institutions, and corporate environments, providing accessible communication is both an expectation and, in many cases, a legal obligation.

CapGo helps organizations make accessibility a seamless part of everyday operations, speed and consistency.

## With CapGo, organizations can:

- Support ADA effective communication requirements
- Improve accessibility for deaf and hard-of-hearing audiences
- Deliver visible communication during live events
- Support emergency and safety messaging
- Communicate with multilingual audiences through live translation in 30+ languages
- Extend accessibility across more events and spaces
- Simplify accessibility workflows for operations teams

# Why CapGo?

Compliance without  
operational complexity

Captioning has traditionally required stenographers, scheduling coordination, specialized workflows, and significant operational overhead.

CapGo replaces those challenges with an automated solution that can be deployed quickly and managed easily by venue staff.

## Benefits

- Support ADA compliance initiatives
- Simplify captioning workflows
- Reduce operational complexity
- Increase accessibility for every guest
- Deploy using existing infrastructure
- Scale across multiple venues and events

# Key Features

## Automated live captioning

Convert spoken audio into live captions using advanced speech recognition technology.

### Benefits:

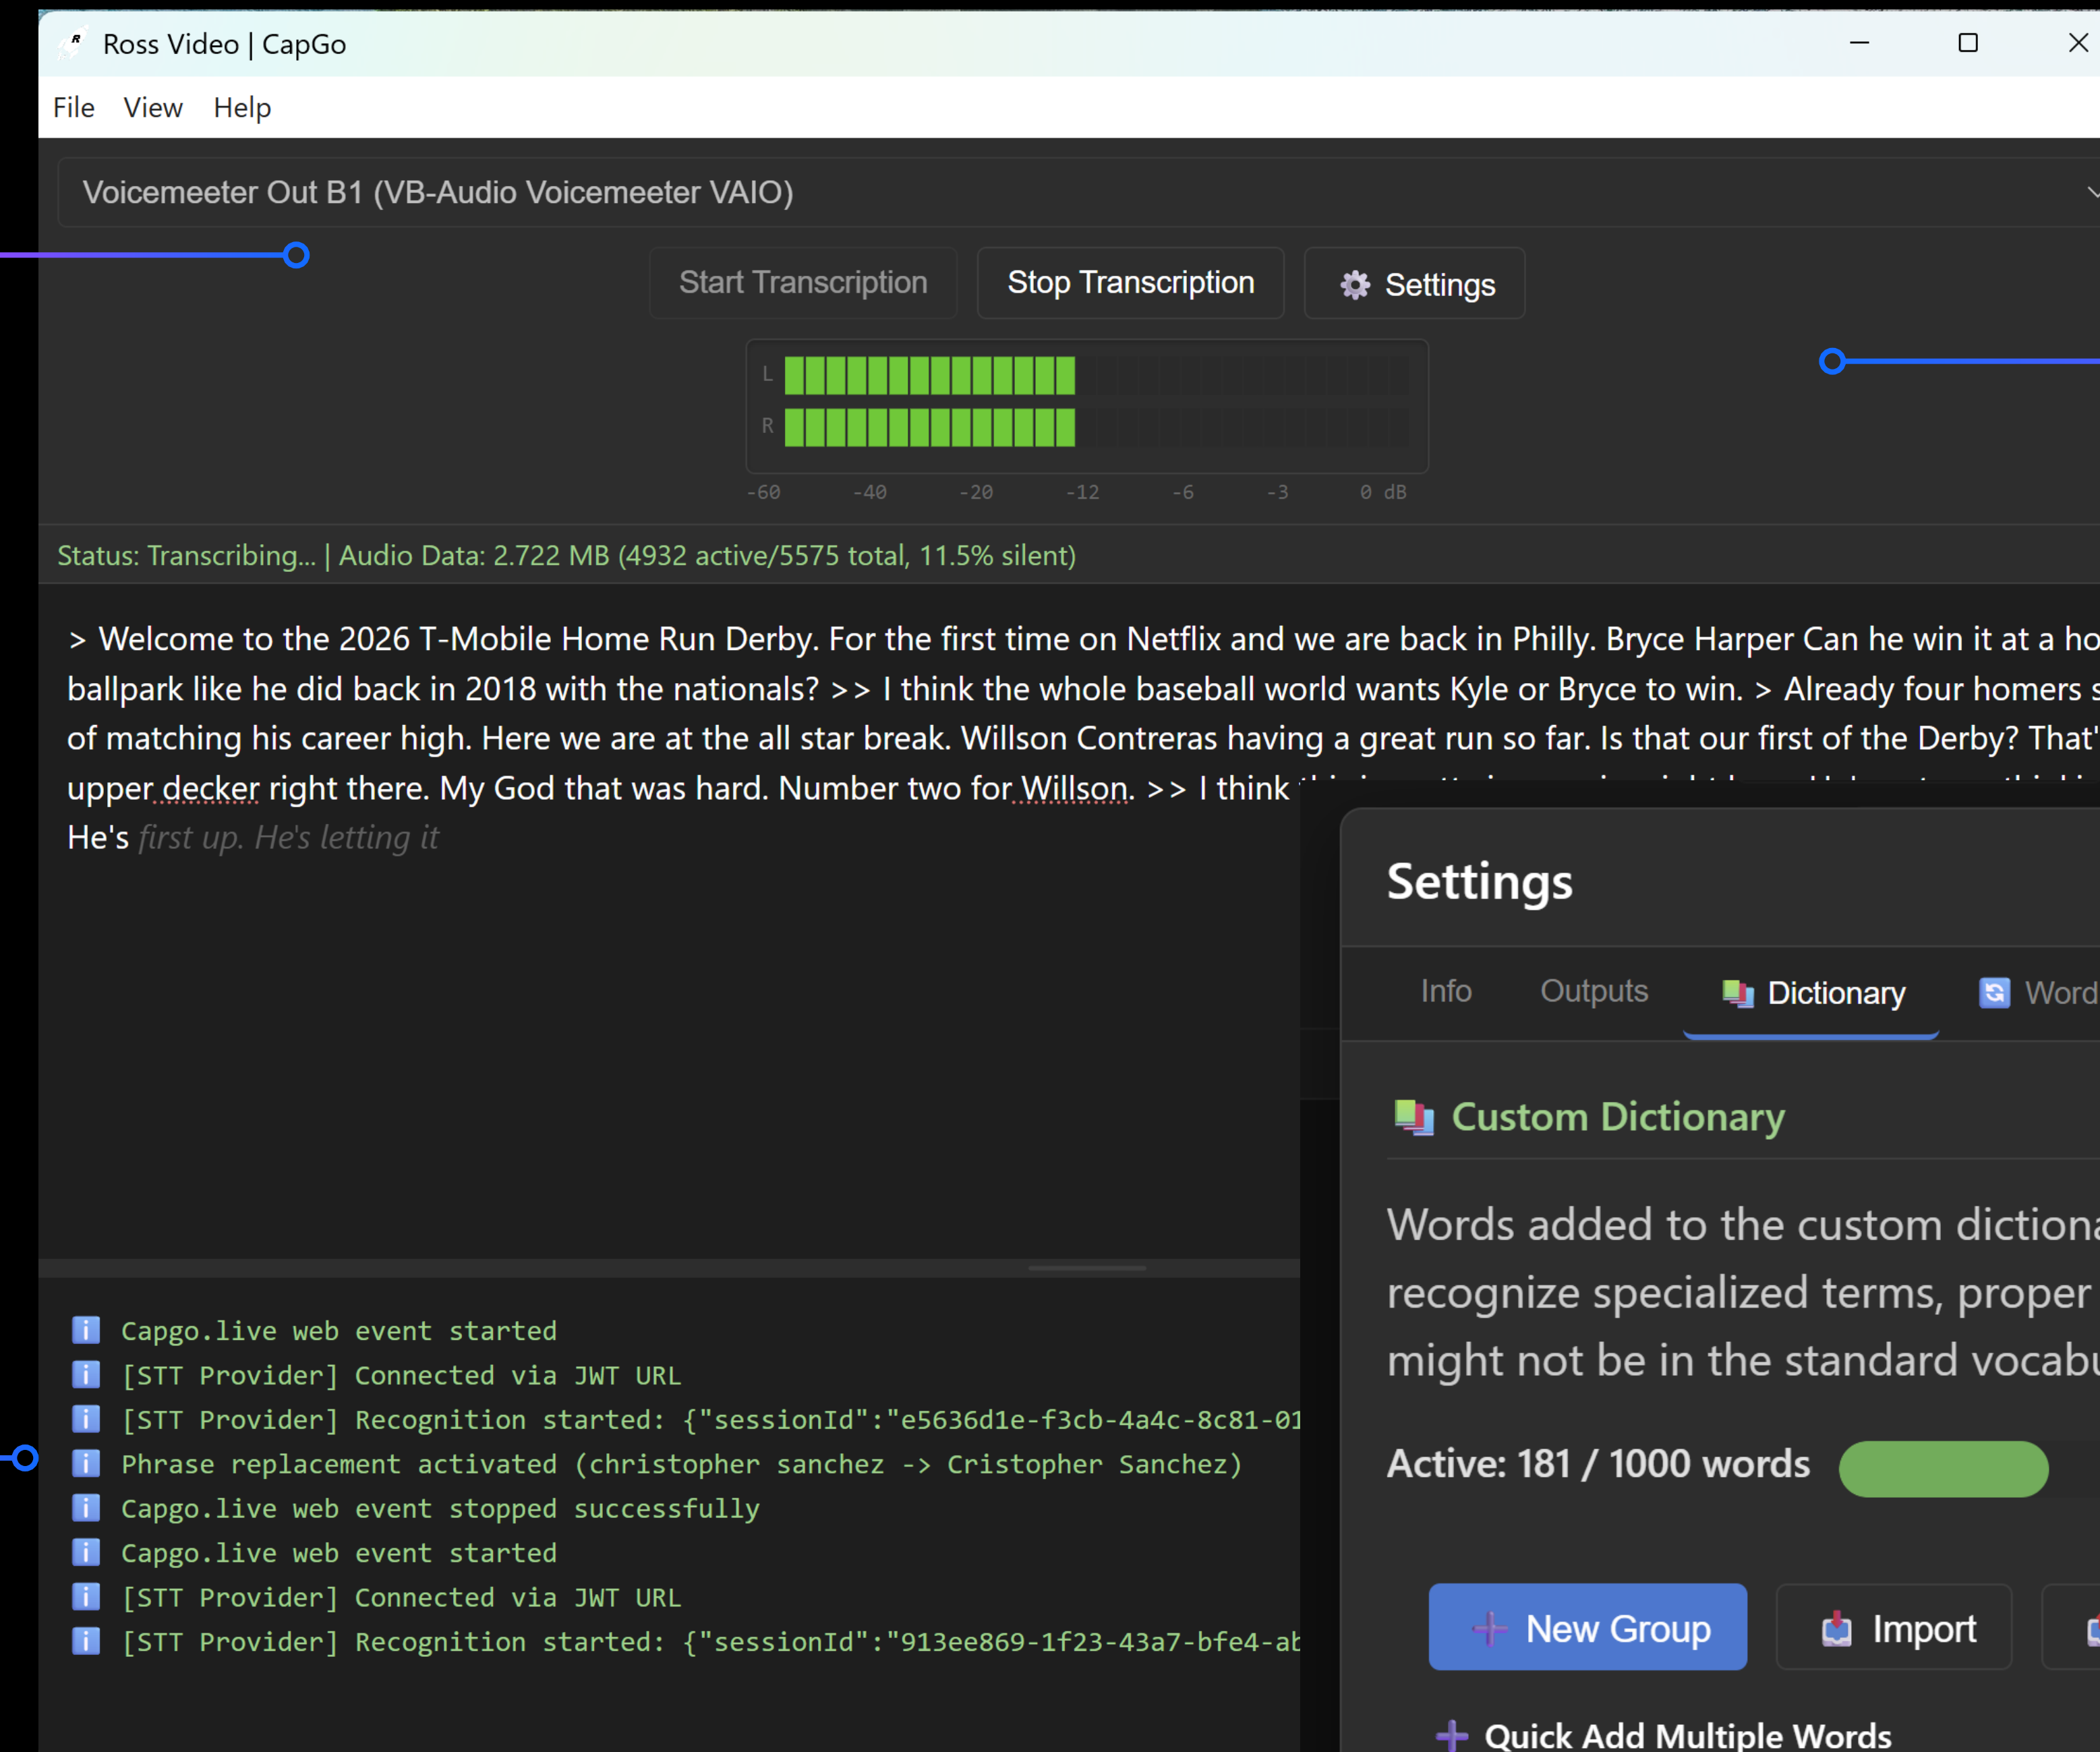

- Real-time caption generation
- High transcription accuracy
- Continuous operation during events
- Simplifies live captioning workflows

## Multi-Language Translation

Automatically translate live captions into more than 30 languages, helping organizations communicate with diverse audiences and create more inclusive experiences.

### Benefits:

- Live translation into 30+ languages
- Support multilingual audiences
- Improve communication across language barriers
- Deliver a more inclusive event experience

## Secure cloud connectivity

Maintain reliable caption delivery through a secure outbound connection.

### Benefits:

- Simplified network requirements
- Secure data transmission
- Reduced IT complexity
- Simplified deployment across multiple venues

## Push-button operation

Designed for operators—not captioning specialists.

### Benefits:

- Minimal training required
- Consistent operation
- Simplifies day-to-day operation
- Faster event preparation

## Venue-friendly deployment

Deploy CapGo as a software-based solution on a standard Windows PC using existing venue audio infrastructure.

### Benefits:

- Software-based deployment
- No specialized hardware encoders required
- Easy integration into existing workflows
- Lower total cost of ownership

# Applications

## Professional sports

Provide accessible game-day experiences while ensuring critical announcements and emergency messaging remain visible to every fan.

## Convention centers

Improve communication during keynote presentations, conferences, and public gatherings by providing live captions and multilingual translations for diverse audiences.

## College athletics

Support campus accessibility initiatives and compliance requirements across athletic venues and events.

## Government facilities

Meet accessibility obligations while ensuring public information remains available to all attendees.

## Arenas & entertainment venues

Deliver captions for concerts, ceremonies, live shows, and public events without requiring dedicated captioning staff.

## Corporate & enterprise spaces

Support inclusive communication during town halls, meetings, and large-scale corporate events.

# The CapGo advantage

## **Business necessity, not another feature**

CapGo addresses a critical operational requirement for modern venues: ensuring every guest can receive important information regardless of hearing ability.

## **Lower cost than traditional captioning**

Reduce ongoing expenses associated with scheduling and managing human captioning services.

## **Faster deployment**

Get captioning operational in minutes using existing infrastructure and a standard Windows PC.

## **Purpose-built for venues**

Designed around the workflows, challenges, and expectations of live sports and entertainment environments.

## **Trusted for high-visibility events**

CapGo is built to perform in the moments that matter most—from daily operations to nationally recognized events.

Deliver every  
message.

Improve accessibility.  
Simplify operations.  
Serve Every Guest.

CapGo helps organizations create accessible experiences through reliable live captioning designed for live events.
