

# CONNEXUS™

## FUTURE-PROOF YOUR KVM MATRIX CONNEXUS TRUE HYBRID SOLUTION

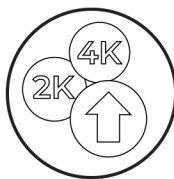

Capitalize on the world's first and finest **True** Hybrid Solution — function as either Rx or Tx; connect fiber or copper; support 2K and 4K on the same matrix — Increase effectiveness of your command-and-control facility with a versatile, robust, and innovative KVM solution. Improve workflow efficiency, tighten up your decision-making process, and reduce the chance of errors with a Connexus KVM Matrix.

Integrating the only KVM Matrix supported by a **True** Hybrid Endpoint, operators can easily access and control multiple, disparate computers. Administrators can more effectively configure, control, and manage all aspects of the KVM matrix. Directors can benefit from the significant savings in hardware, real estate, and energy costs.

### SAVE MONEY — TRUE HYBRID ENDPOINT

Reduce your provisioning time significantly, reduce operational costs and improve your ROI by deploying the world's first, IP-Based, **True** Hybrid Endpoint.

### MAXIMIZE VERSATILITY — 2K/4K SUPPORT

Maximize the versatility of your matrix by deploying endpoints that support over 90 video modes, in both 2K and 4K resolutions, and over fiber or copper.

### INCREASE DISTANCE — FIBER CONNECTIVITY

Send video, audio, and USB signals up to 80 kilometers, using fiber-connected, lower-latency devices, and a more scalable, 10G KVM network.

# ROSS

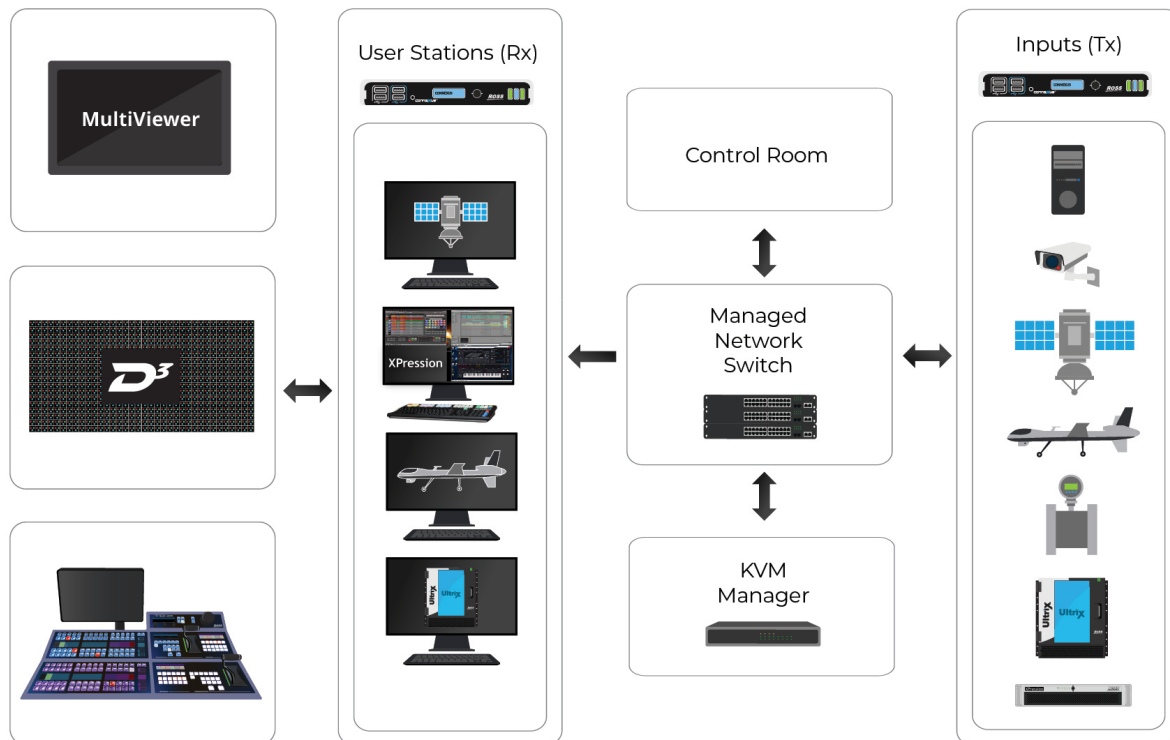

## CONNEXUS KVM MATRIX SOLUTION SET

One Matrix to support all of your KVM connectivity needs.

- True hybrid endpoint (Rx or Tx)
- 10G fiber network
- Uncompressed video
- Extenders for point-to-point connection
- Managed KVM matrix support
- Display Port 1.3 (Rx/Tx)
- Over 90 video modes from 1024x768 up to 4096x2160@30
- LCD display with joystick navigation
- Support thousands of Endpoints (Rx/Tx units)
- Unlimited number of users
- Analog Stereo Audio (3.5mm jack)
- Digital Peak Program Meter
- Supports a variety of redundancy configuration
- World-class, integrated customer GUI
- Military-grade security protocols
- Faster, almost instant provisioning
- Organize and group host computer systems and users
- Dedicated RJ45 interface
- IP-based KVM Matrix

## ROSS ECOSYSTEM

*Improve workflow, increase efficiency, and reduce errors.*

*"The most pressing need for our KVM Matrix is finding Hybrid Endpoints that can function either as a Tx or an Rx"*  
— Seasoned KVM Administrator
