VERSION HISTORY

VERSION 8.0 – MARCH 2026

This document describes the **Initial Release (v8.0)** of **RVS Project Manager**.

RVS Project Manager is a centralized publishing and deployment tool for Ross Virtual Solutions (RVS) applications. It enables controlled distribution of RVS projects from a central **XPression Project Server** to multiple RVS systems.

This release establishes the foundation for secure, structured project management across Lucid Studio, Voyager, and Voyager Trackless environments.

WHAT RVS PROJECT MANAGER OFFERS

RVS Project Manager v8.0 delivers:

- Centralized publishing of RVS projects to XPression Project Server
- Controlled deployment of approved revisions to target machines
- Version tracking and revision visibility
- Application-safe locking, shutdown, and restart handling during publish/deploy operations
- Simplified multi-system project synchronization

The result: fewer inconsistencies, safer updates, and predictable project distribution across production systems.

INCLUDED IN THE INITIAL RELEASE

- Integration with:
 - Lucid Studio
 - Voyager
 - Voyager Trackless
- Publishing workflow to XPression Project Server (v12.5.6127).
- Deployment workflow from Project Server to local systems.
- Revision management and selection.
- File-level inclusion/exclusion during publishing.
- Logging and operational feedback.
- Multi-server configuration support.

SYSTEM REQUIREMENTS & PREREQUISITES

REQUIRED COMPONENTS

Before using RVS Project Manager, ensure:

- **XPression Project Server** is installed, licensed, and configured.
- A **Show** and **Category** are created in XPression Project Server Manager.
- RVS applications are version 8.0 or later.
- RVS Engine Service is installed.

VOYAGER-SPECIFIC REQUIREMENTS

- RVS Engine Service must be running.
- Service IP Address must be set to **0.0.0.0** for internal and external connections.

GETTING HELP

- After-sales service and technical support is provided directly by Ross Video personnel.
- During business hours (Eastern Standard Time), technical support personnel are available at the numbers listed below.
- After hours and on weekends, customers will automatically be put through to the technical support person on call. For serious issues which need urgent attention and tracking, please ensure you are given a ticket number and refer to this in future communications.

TECHNICAL SUPPORT: (+1) 613-686-1557
