

XPression

Getting Started

⚠ CAUTION: Before you set up and operate this product, see the “Important Safety Instructions” in your Manual.

- 1 Attach the handles to the front rack-mount tabs by aligning the handle with the round holes and fastening from the rear with the supplied screws.
- 2 Use the supplied Rack Mount Kit to mount the XPression system in a 19" EIA equipment rack.
For information on installing the XPression chassis in a rack, see the provided document "Installing the Chassis in a Rack".
- 3 Plug the supplied Keyboard into a **USB** port.
- 4 Plug the supplied Mouse into a **USB** port.
- 5 Connect a Monitor (customer supplied) to any of the four display ports.
KVM extenders (customer supplied) are required when the XPression system monitor, keyboard, and mouse are located remotely from the rack room.

- 6 Insert a small form-factor pluggable (SFP) (customer supplied) into SFP cage 1 and attach the necessary networking cable.
- 7 If using redundancy, insert a small form-factor pluggable (SFP) (customer supplied) into SFP cage 2 and attach the necessary networking cable.
- 8 Plug an Ethernet cable from your Local Area Network into one of the **Ethernet** ports.
XPression systems can run standalone or accept a connection to a production network. The network connection is also used for the RossTalk / Smart GPI Feature.

Continued on other side...

Getting Started continued

- 9 Connect power cords from the **AC** Ports on the XPression system to the mains power.
XPression system power supplies are auto-sensing and can use either 110 VAC or 220 VAC.
- 10 Press the Power button (⏻) on the front of the XPression system.
Ross Video recommends shutting down XPression systems from the Windows operating system.
- 11 Click the XPression user account icon to log onto the system.
- 12 Launch XPression from the **Start** menu.
