# XPression

Getting Started

⚠️ CAUTION: Before you set up and operate **XPression™ Studio** *GO!*, **BlueBox** *GO!*, or **Prime** *GO!*, read the safety instructions in the manuals for all applicable devices.

1   Connect the power cable from the power connector to an outlet.

2   Connect the Thunderbolt™ 2 cable from the Thunderbolt 2 port on the box to the Thunderbolt 2 port on the StarTech® adapter.

3   Connect the Thunderbolt 3 cable from the StarTech adapter to the Thunderbolt 3 port on the laptop.

4   Connect video output cable from the HD/SDI **SDI Out 1** BNC connector to the required destination.

5   Connect video output cable from the HD/SDI **SDI Out 2 (**Key Out) BNC connector to the required destination.

6   Connect reference input cable to the **Ref In** BNC connector.

7   Power up the video interface by pressing the power button (⏻) on the front of the box.
         Note: Always power up the box before powering up the laptop.

8   Power up the laptop.

9   Install the AJA® IOXT™ driver (see *XPression GO! AJA IOXT Driver Installation* instructions for details).

10   Install the XPression software.
