

TouchDrive 1.0

- Release Date: November, 2020.

Important: Please review the **End User Software License Agreement** before installing or using this software.

Software Upgrade

Before starting the upgrade, ensure that you have the following upgrade files:

- **Panel Upgrade** —
TouchDrive-1.0-125.tgz
- **DashBoard Upgrade** —
DB9.1.4_linux.gtk.x86_64.tar.gz

To Upgrade the Panel

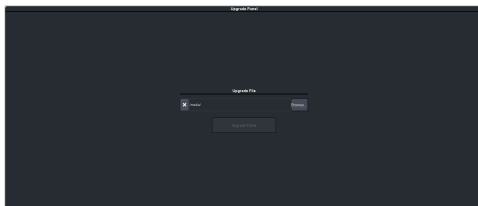

Upgrade the software on the control panel.

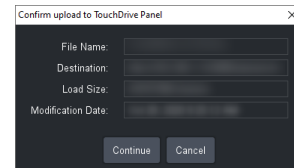

Important: Do NOT turn the control panel power off during the upgrade. Doing so may corrupt the software or damage the control panel components.

Tip: The control panel can be upgraded from a remote DashBoard computer or from the panel itself. If you are upgrading from the panel, you must put the upgrade file onto a USB and insert that USB into a USB port on the control panel.

1. From the tree view for the control panel, double-click **Configuration > Upgrade Panel**.

2. Click **Browse...** and navigate to the control panel upgrade file.
3. Select the panel upgrade file and click **Open**.
4. Click **Upgrade Panel**.
5. Click **Yes**.
6. Click **Continue** to upload the upgrade file to the control panel and start the upgrade.

7. Wait for the DashBoard pages to come back up. This may take a few minutes.

To Upgrade DashBoard on the Control Panel

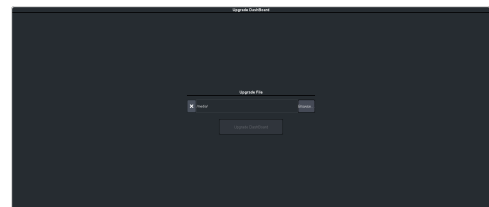

Upgrade the DashBoard control system software on the control panel.

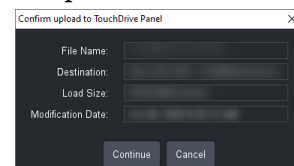

Important: Do NOT turn the control panel power off during the upgrade. Doing so may corrupt the software or damage the control panel components.

Tip: The control panel can be upgraded from a remote DashBoard computer or from the panel itself. If you are upgrading from the panel, you must put the upgrade file onto a USB and insert that USB into a USB port on the control panel.

1. From the tree view for the control panel, double-click **Configuration > Upgrade DashBoard**.

2. Click **Browse...** and navigate to the control panel upgrade file.
3. Select the DashBoard upgrade file and click **Open**.
4. Click **Upgrade Panel**.
5. Click **Yes**.
6. Click **Continue** to upload the upgrade file to the control panel and start the upgrade.

7. Wait for the DashBoard pages to come back up. This may take a few minutes.
