

Ultrix FR5 Frame

NOTICE Adequate ventilation within a rack frame must be maintained. Ensure side to side ventilation is not compromised. Refer to the Ultrix Installation Guide for more information.

Notes:

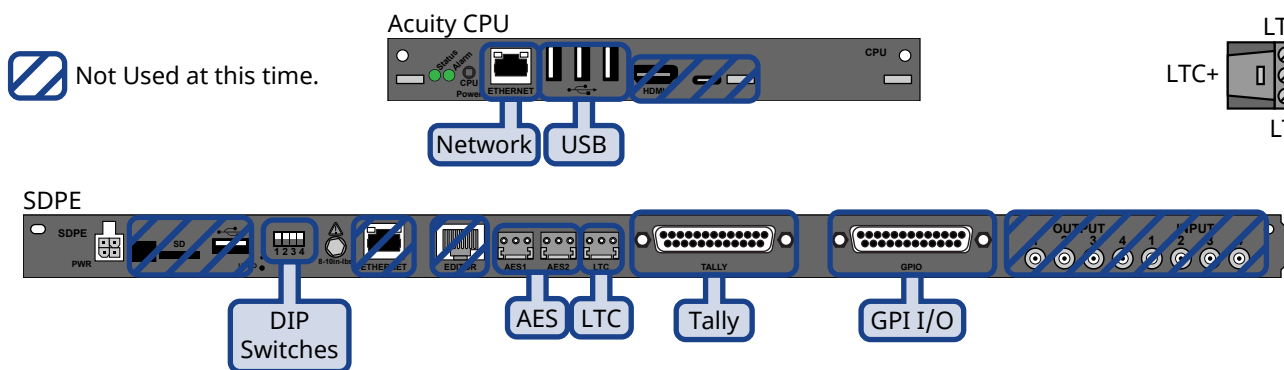

- The Ultrix FR5 frame supports the Acuity switcher platform with up to 4 MEs.
- The switcher uses the Reference input to Ultrix for timing.
- All 4 power supplies must be connected to operate the switcher.
- The Input and Output HD-BNCs on the SDPE blade are not used at this time.
- Physical sources and destinations on the router must be mapped internally to inputs and outputs on the switcher.
- The Ultrix SDI I/O blade is used to provide the sources and destinations that the switcher can access.
- The REF B connection is not supported at this time.
- A 1GbE ethernet connection is required for Ultrix.
- An Ultracool may be required, depending on your installation.
- The Protective Earth Stud may not be present on all frames.

Note: The placement of the SDPE blades shown (slots 8,7,6,5) is only supported by Acuity 11.2a or higher.

Acuity Switcher

Not Used at this time.

CAUTION! Electrical shock hazard. The Power connector (PWR) must always be disconnected when the SDPE blade is not installed in the frame.

Notes:

- The switcher is made up of a single Acuity CPU board, and a number of SDPE blades. Each SDPE blade provides a single HD/UHD ME.
- The number of SDPE blades a system can have depends on the size of the Ultrix frame and the other blades that are installed.
- Only the Ethernet port on the Acuity CPU card can be used to connect to the Acuity software.
- The Power, Ethernet, USB, SD, and Input/Output HD-BNCs on the SDPE blade are not used at this time.
- The GPI and Tally ports on each SDPE blade are independent of each other. As you add more SDPE blades, each ME has an independent set of GPIs and Tallies.

Tally (female DB25)				GPI I/O (female DB25)			
Pin	Tally	Pin	Tally	Pin	GPI	Pin	GPI
1	1	14	14	1	I/O 1	14	I/O 14
2	2	15	15	2	I/O 2	15	I/O 15
3	3	16	16	3	I/O 3	16	I/O 16
4	4	17	17	4	I/O 4	17	I/O 17
5	5	18	18	5	I/O 5	18	I/O 18
6	6	19	19	6	I/O 6	19	I/O 19
7	7	20	20	7	I/O 7	20	I/O 20
8	8	21	21	8	I/O 8	21	I/O 21
9	9	22	22	9	I/O 9	22	I/O 22
10	10	23	23	10	I/O 10	23	I/O 23
11	11	24	24	11	I/O 11	24	I/O 24
12	12	25	Common	12	I/O 12	25	Ground
13	13			13	I/O 13		

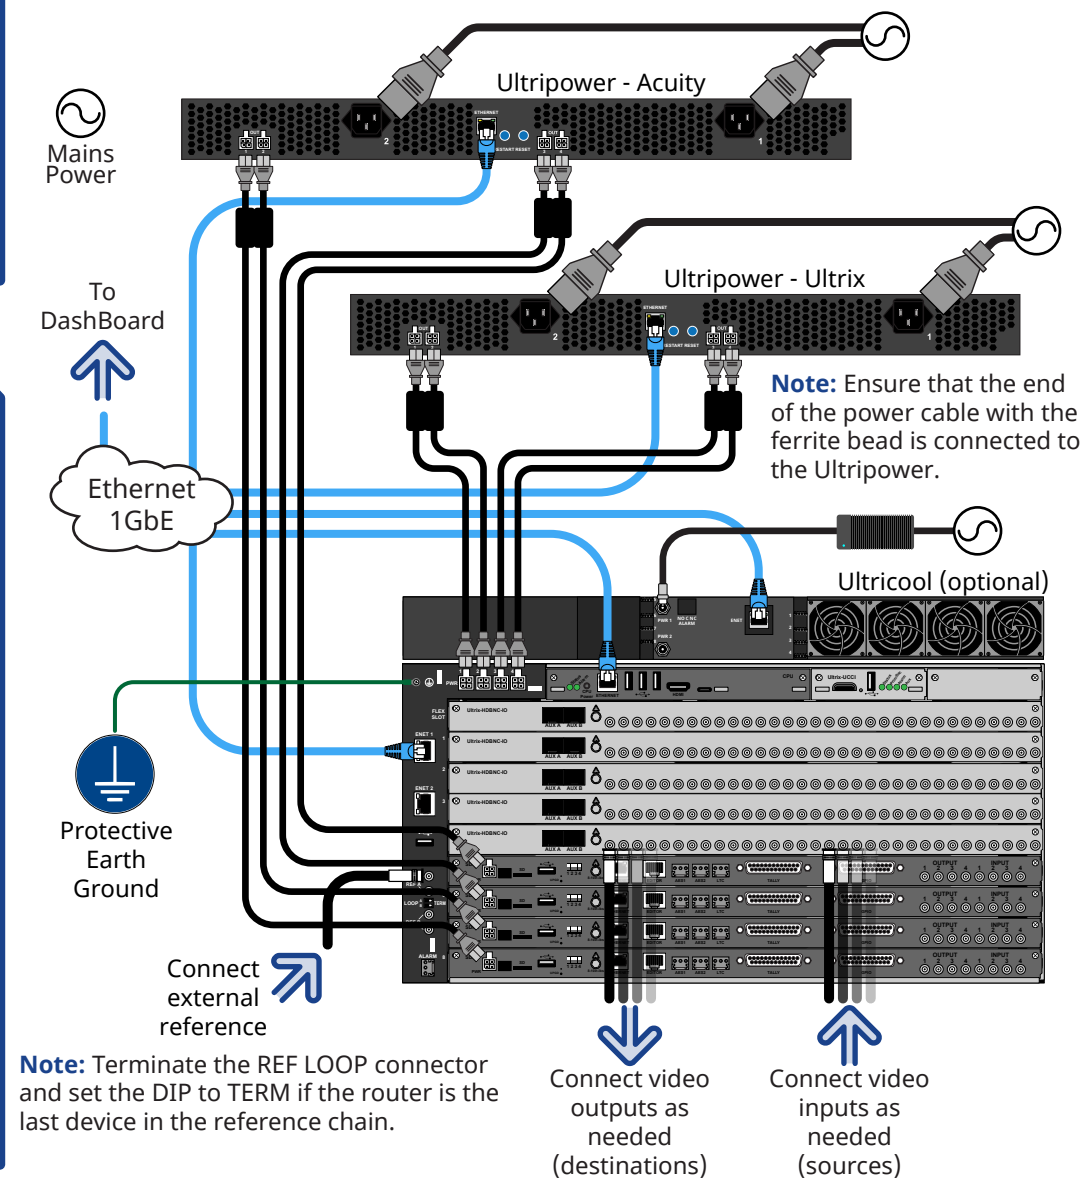

Power and Cabling

Read the instruction manual for your Ultripower and Ultrix FR5 before starting work or operating equipment.

CAUTION! Risk of electrical shock. Enclosure shall be connected to earth ground via protective earth stud and 18AWG conductor or larger.

NOTICE The Ultrix frame and SDPE blades do not have power switches. Ensure that the Ultripower is not connected to mains power before connecting the power cables from the Ultripower to the Ultrix.

Tip: You can use Ultripower groups and Manager to control both Ultripower units at the same time. Refer to the Ultripower document

Note: Terminate the REF LOOP connector and set the DIP to TERM if the router is the last device in the reference chain.
