Audio\Video Tray

AVM-7564-03

AUDIO VIDEO TRAY

This Audio/Video tray will more than satisfy the most demanding network considerations. The tray is visually attractive and incorporates advanced ventilation and cooling engineering. The tray holds 2 video amplifiers, 2 audio amplifiers, and one (1) PS-7103 video power supply. A power cord is provided for the power supply.

The tray door is completely removable to provide convenient access in any rack installation position. Pivot points are provided on the tray near the door bottom to make it easy to install the door. The door is designed to be placed on the pivots and then rotated until the latches click into position.

The audio connector strips are of a new smaller design that allows all pins to be identified at each connector. On the rear of the tray is a wiring guide diagram for the connector blocks.

Our unique design incorporates a shelf located on the rear of the frame which provides a means of keeping cabling uncluttered and orderly. It also prevents unnecessary stress which is usually placed on cables and connectors.

Note: The only **audio** products suitable for use in this tray are distribution amplifiers type ADA-7551, ADA-7554 and ADA-7555, both in normal and 600 ohm versions. The maximum output level shown in the specifications for these products must be reduced by 5dB due to the reduced voltage available from the power supply used with this tray. Because of the reduced voltage, other models of audio products will not function correctly in this frame.

Features

- ◆ Accommodates 2 audio and 2 video amplifiers in 1 rack unit
- ◆ Aluminum construction for increased heat dissipation
- ◆ Removable tray door for accessibility
- ◆ Optional module extender for servicing
- ◆ Power switch and fuse is accessible from front of the rack tray
- ◆ *PowerLock* cord retainer mechanism guards against accidental power loss
- ◆ Universal power supply accommodates all world standards (85 - 250 volts)
- ◆ High capacity power supply is cooler running
- ◆ 5 year transferable warranty
- ◆ Handles both Audio & Video Distribution in a 1-RU tray
- ◆ Also accepts GVG* Video DA's

GVG* is a trademark of Tektronix Inc.

Installation

1. Mechanical

The tray mounts in the rack cabinet by means of four screws through the front mounting flanges. This should normally be sufficient to carry the load, including weight of cables. In some cases, (mobile trucks, etc.) it may be desirable to also support the rear of the tray. Rear support brackets (Ross part # FSB-7110) are available for a nominal cost.

To Install the support brackets (AVFR-7564):

A) The rear support bars can be attached to the Ross tray in six possible positions. See the illustration. Choose the position that suits the cabinet depth and will give approximately a 1/2 inch projection beyond the rear vertical mounting rails. Using four screw per bracket as shown in the illustration, attach both bars.

B) Mount the Ross tray to the front rails of the rack cabinet using rack screws.

C) At the rear of the cabinet, slide the bracket slots over the rear of the support bars and secure to the cabinet rear rails with rack screws.

2. Ventilation

This tray has been specially engineered to minimize internal heat buildup and thus improve module reliability. However, for improved air flow, it is best not to stack more than two frames without a blank panel above and below the pair.

3. Power Supply PS-7103 and Power Cord

Turning the power supply off before inserting or removing it from the tray will ensure long connector life.

4. Video Input and Output Cables

The tray BNC connectors have been marked as inputs and outputs. In some cases, the connectors will have been assigned a different function. Consult the installation section of each module for an illustration showing connector functions.

5. Video Terminations

It is not necessary to terminate unused analog video outputs to meet 0 - 5 MHz performance. Terminations are required only if it is necessary to meet response specifications in the 5 to 20 MHz range.

6. Audio Input and Output Cables

The tray uses a new, smaller connector block, which has more terminals than previously possible in the space available.

The use of the smaller connector block made it possible to increase the number of amplifier outputs to eight and offer a dual four-output DA for stereo to fit the same tray.

Connect the external cables to the terminal blocks in accordance with the illustrations on the following page. The terminations are marked with output connection numbering for the 8-output mono amplifier. The stereo table below shows the corresponding output connection numbering for 4-output stereo amplifiers.

Note: It is easier to put two wires into one terminal if they have first been twisted together. It also helps if a small round tool or nail is used first to fully open the terminal hole when two wires are to be inserted.

7. PCB Designation Label

A PCB Designation Label Sheet with adhesive backing has been inserted inside the back cover of each of the tray binders.

Use scissors or a sharp knife to cut out two strips from the page. For all occupied tray slots write the amplifier type, signal source or function and amplifier number if applicable. Peel off the backing paper and stick the label to the tray according to the sketch on the label sheet. Please see the example illustrated in the installation section of this manual. (Please Note - This template may be copied in the event that the PCB Label insert is lost.)

Specifications

Power Supply, PS-7103	Input Voltage 85-250V, 50/60 Hz
	Input Power 55VA max.
	Output Voltage $\pm 13.5V$
	Output Current 1.7A
	Output power 46 W
	Line Regulation 350mV change over full input range
	Output ripple < 60 mVpp
For safety reasons, Ross power supplies do not fit into rack frames of other manufacturers.	
Rack Tray Mechanical (AVFR-7565)	Height 1 $\frac{3}{4}$ " (44mm)
	Width 19" (483mm)
	Depth 16" (407mm)
	Weight, average for all amplifiers installed: approx. 7.4 lbs. (3.35kg)
Environmental	Equipment is designed to operate in ambient temperature ranges from 0° C to 50° C
	Humidity <95% non condensing

Specifications are subject to change without notification

Ordering Information

AVFR-7564	Audio/Video Mounting Tray - 1RU, Holds 4 modules (Note: the tray does not include power supply)
PS-7103	Universal Power Supply (85-250 volts)
ADA-7551	Audio Distribution Amplifier
ADA-7551-600	Audio Distribution Amplifier (600 ohm version)
ADA-7554	Stereo/Mono Audio Distribution Amplifier
ADA-7554-600	Stereo/Mono Audio Distribution Amplifier (600 ohm version)
EXT-7511	Extender Board
FSB-7110	Rear Support Brackets
310-008	BNC Termination

An Owner's Manual is supplied with each product.

Note: The video frame does not include the power supply. The frame requires one supply.

DISTRIBUTION PRODUCTS WARRANTY and REPAIR POLICY

- 1.** Ross Video Limited (the Company) warrants its products to be free from defects in workmanship and material under normal use and service for a period of **FIVE** years from the date of shipment. If, within the warranty period, the customer notifies the Company that a product is defective, the Company will correct the defect, either by repairing the defective product or if not repairable, by shipping a replacement product to the customer, as determined by the Company.
- 2.** Liabilities under this warranty is limited to the repair or replacement of the product as determined by the company and is in lieu of all other warranties expressed or implied.
- 3.** This warranty does not extend to any product which has been subjected to misuse, neglect, accident, improper installation or application, nor does it extend to products which have been repaired or altered outside the factory by personnel other than those of the Company, unless expressly authorised in writing by the Company.
- 4.** Warranty repairs will be made at the Company's plant unless otherwise specified in writing by the Company. All packing, shipping, and special handling costs will be paid for by the customer.
- 5.** Non-warranty repair service made at the factory will be at customer expense. Cost of repairs will be quoted following examination of the product by Company personnel.
- 6.** In no event shall Ross Video Limited be liable for direct, indirect, special, incidental, or consequential damages (including loss of profits).
