

softGear Streaming Gateway Cloud Installation

Complete the following steps to install the softGear Streaming Gateway in the cloud.

To install the Streaming Gateway in the cloud

1. Launch a cloud instance with Ubuntu 20.04.
2. Upload the following installer to the home directory in the cloud instance:

```
ssg-2.x.x-*-[date]-*****.install
```

3. Make the installer executable:

```
chmod +x ssg-2.x.x-*-[date]-*****.install
```

4. Run the installer:

```
sudo ./ ssg-2.x.x-*-[date]-*****.install
```

The installation will take approximately 5 minutes to complete.

5. When the installation completes, run:

```
sudo /etc/init.d/ross-river restart
```

The Streaming Gateway should now be visible to DashBoard.

6. Launch DashBoard from another instance running in the same VPC as the Streaming Gateway.
7. Add the Streaming Gateway to DashBoard using its internal VPC IP address.
