Ultricore Tally

Versatile Tally Control Solution

Ultricore Tally is the ultimate tally control solution, enabling efficient coordination and collaboration in any production environment by providing essential status updates to control room personnel and on-air talent. Built on the proven foundation of the Image Video technology, Ultricore Tally's extensive interoperability, scalability, and configuration flexibility make it an indispensable asset for achieving flawless live broadcasts.

ROSS

Works with a multitude of equipment

Ultricore Tally integrates with a wide range of industry-standard communication protocols, ensuring seamless interfacing with both Ross Video and third-party devices. It dynamically acquires video distribution information from various sources and displays tally information on a variety of devices, including control panels, monitor walls, traditional tally lights, and more. Built on the rock-solid and widely deployed foundation of Image Video technology, Ultricore Tally integrates with any workflow.

Scalable to any production

From small setups to complex systems with shared resources across multiple control rooms, remote studios, and mobile broadcast trucks, Ultricore Tally adapts to your needs. It efficiently handles complex topologies, including tie-lines, re-entry sources, shared equipment, and multiple studios. Designed for 24/7 operation, it offers redundant configurations to ensure mission-critical reliability, even in the most demanding production environments.

Customizable to your workflow

The Tally System Console allows easy centralized configuration and management of Ultricore Tally. Any number of tally configuration files can be saved and recalled to suit the needs of different productions or operator preferences. Flex all of Ultricore Tally's capabilities: Define connection models, configure tally activation via a multitude of GPIO devices and even create multiviewer widgets to indicate the status of non-video devices.

Flexible deployment

Ultricore Tally is a software license that adds powerful tally control functionality to Ultricore BCS, eliminating the need for additional hardware for those already using Ultricore BCS within their Ross Ultrix systems. It can also operate as a standalone tally control system, leveraging the processing power of the compact, energy-efficient, silent and easily deployable Ultricore BCS hardware. This flexibility allows for cost-effective deployment and seamless integration into any production environment.

Example integration of Ultricore BCS with Ultricore Tally and Ross Devices.

Ultricore BCS
System Control and Interface

PC running DashBoard

OGX-FR Frame
with at least one GPI-8941 card

LCP-16
Remote Control Panel

TXI-48
Tally Expansion Interface

TXP-16
Tally Expansion Interface

Internet / LAN / VPN

Ultrix Router
