IP & SDP WORKFLOWS

Acuity is the top-of-the-line large production switcher designed to handle the world's most challenging live events.

Features/Benefits

- Up to 8 MEs with loads of keying power for maximum video processing capability in UHD and HD.
- MultiFeed provides huge configurable output capability with 6 Program and 2 Preview outputs on a single ME.
- Powerful MultiViewers can monitor 200 discrete video buses across up to 14 heads.
- Specialized I/O cards for total I/O processing - including frame syncs, format conversion, proc amps and SDR/HDR conversion - as well as SDI/IP connectivity.

IBC Highlights

ACUITY^{IP}

IP support for Acuity, the world's most powerful production switcher, with AIMS-compliant IP options to interface to standards-based SMPTE 2110 and ST 2022-6 infrastructures.

UHD & HDR

With the click of a button, Acuity can be turned into a fully-featured Multi-ME UHD switcher. Acuity also handles HDR / WCG video in both UHD and HD formats.

SINGLE-LINK 12G CONNECTIVITY

Hybrid solutions that simultaneously utilize 3G quad link & 12G SDI single-link connectivity to help make the transition to a UHD facility.
