

CARBONITE BLACK SOLO

COMPACT PRODUCTION SWITCHER

Compact and affordable, the Carbonite Black Solo 1ME production switcher is built with the tools to create a top-notch show, wherever you take it.

Features/Benefits

- Main ME with major effects and keying power.
- Built-in MiniMEs offer additional production resources.
- Internal video processing and monitoring tools to reduce external gear.
- Simple control with an ergonomic control panel, DashBoard software, and ViewControl touchscreen.

IBC Highlights

SOLO 13

SOLO13

This new model doubles the SDI input connectivity of Carbonite Black Solo, to get more use out of this switcher's compact form and powerful feature set.

GRAPHICS SOFTWARE INCLUDED

XPression LiveCG complements your show with high-quality still graphics. Graphics are fed directly into the switcher media channels over Ethernet for a simple workflow.

THREE CONFIGURATIONS

Available in an easily-transported all-in-one switcher, 1RU chassis with software control, or separate panel & chassis combo.
