

CARBONITE BLACK

MID-SIZE PRODUCTION SWITCHER

Carbonite Black provides the biggest creative feature set for mid-size productions.

Features/Benefits

- Carbonite Black packs major effects and keying power into 1, 2 or 3 MEs.
- Proven day-after-day in a wide variety of production environments.
- Fine-tuned for production efficiency, easy to navigate the panel and take what you need to air.
- Built with internal signal processing resources to easily manage differing equipment and formats.

IBC Highlights

UHD SWITCHER

Carbonite Black can be reconfigured into an incredibly powerful 1ME 9 IN / 5 OUT full UHD switcher.

HDR CONVERSION

Carbonite Black is able to convert between SDR and HDR (HLG1200) for simple incorporation of SDR sources into your HDR productions.

SOFTWARE-DEFINED LIVE PRODUCTION

Carbonite Black's versatile platform is the basis of the Mosaic video-image processor system and the UltrachromeHR chroma key system. This single frame's processing hardware can be changed on the fly via software license.
