

GOVERNMENT LEGISLATURE

Broadcast technology is increasingly being used by national agencies, state governments, and local communities to make information more accessible to constituents.

Features/Benefits

- Get expert broadcasts without having to be broadcast experts.
- Display and update pertinent speaker, meeting, and agenda information in real-time.
- Get centralized device control of robotic cameras, microphone systems, and graphics.
- Start broadcasting assembly proceedings after only 30 minutes of training – no detailed knowledge of production switching or character generation required.
