IP & SDP WORKFLOWS

Graphite provides a full production solution within a single 4RU frame, with dedicated hardware to ensure rock-solid reliability during your productions.

Features/Benefits

- Switch with confidence on Carbonite, the mid-sized switcher powerhouse.
- True 3D objects and animations, with near limitless layering on a single channel of XPression Graphite.
- Record and playout video clips with the integrated dual-channel XPression Clips server.
- Handle demanding live audio with the 46-channel RAVE audio mixer.

IBC Highlights

INCLUDED GRAPHICS PACKAGES

Graphite ships with 6 professional motion graphics packages for news and sports. These packages are easily-customized and come with simplified control interfaces to manage live graphics operation.

HARDWARE AUDIO CONTROL INTERFACES

The latest Graphite software version enables control of the RAVE audio mixer from a USB-connected MIDI audio mixer panel.

OVERDRIVE + GRAPHITE

The OverDrive + Graphite bundle marries the industry's most widely-used Automated Production Control system with the all-in-one production powerhouse.
