Automated Production Control (APC) is now common place, delivering operational efficiencies, while taking complexity out of the production process.

Features/Benefits

- Perform manual, semi-automated or fully automated productions at any time from the same control room, using the same equipment.
- OverDrive offers unparalleled choice with integration to more than 250 different production devices.
- ROI can occur in a little as 12 months, offering a significant return for a capital expense.
- Easily accommodate live breaking news and changes on-the-fly. With a toolset unmatched by any other system, OverDrive is the clear leader in managing late-breaking or unscripted events.

IBC Highlights

IMPROVED UI CUSTOMIZATION

NEW DEVICE AND SWITCHER SUPPORT

(Graphite, Kula, 2-ME configurations)

MORE POWERFUL TEMPLATES = SHORTER DAILY PRE-PRODUCTION
