IP & SDP WORKFLOWS

The PIVOTCam camera offers high performance image capture with PTZF that is quiet and accurate, at a very attractive price, making it a fantastic value.

Features/Benefits

- Fast and efficient Pan/Tilt/Zoom and Focus control with preset recalls.
- Pivotal moments are captured for you in high quality and high definition, quickly and accurately.
- No need for additional hardware to control and save presets. Ross DashBoard offers a software approach to control and manage your PIVOTCam SE.

IBC Highlights

PIVOTCAM SE

The PIVOTCam SE is a 1080P camera that uses a 4K sensor for greater detail. It offers a number of added enhancements over the Pivot 20 including: 23x optical zoom, native IP control, local genlock reference input, Power over Ethernet and and H.264/265 streaming output.

BE ON TARGET

Fast and efficient Pan/Tilt/Zoom and Focus control with preset recalls. A large rotation angle range, ultra-smooth PTZ mechanism, and preset positions come together for fast and smooth maneuvering of the camera.

PIVOT CAM-20

The PIVOTCam-20 offers 3G 1080P and HD visuals with low noise and high sensitivity, combined with 20x optical zoom via high quality optics. Total production control is obtained via DashBoard software panels with preset store and recall of shots, along with live joystick control via production switcher control panels.
