

# SPORTS & LIVE EVENTS

While keeping fans engaged is the obvious objective, many venues are struggling with separate workflows and platforms including Graphics, Clip Players, Score Bug, Tickers, Branding Telestration, Talent Touch, Augmented Reality, and Virtual Sets.

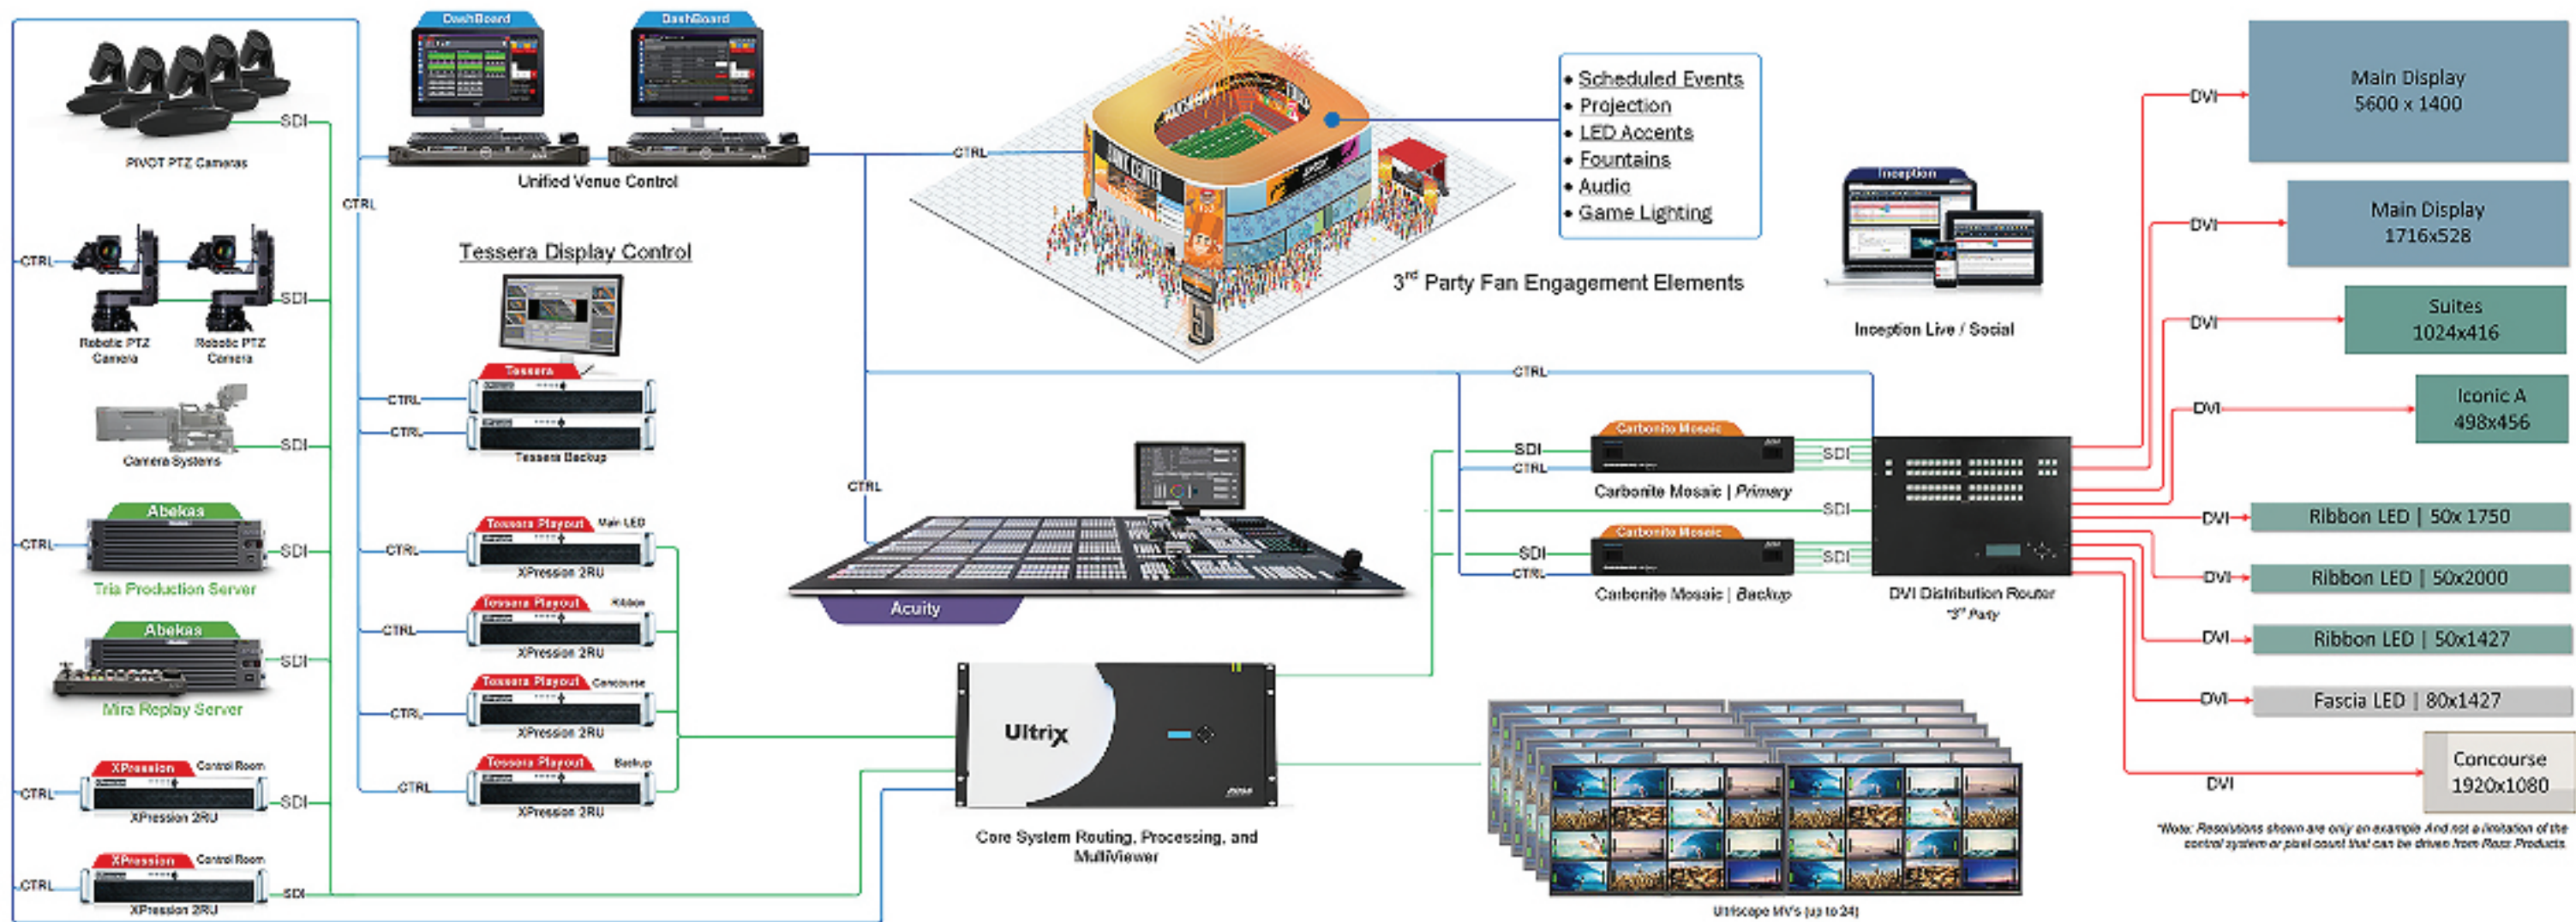

## Features/Benefits

- Realize unified production, display, and overall venue control including lighting, mechanical, fountains, and more with Ross DashBoard.
- Integrate with existing infrastructure and 3rd party products via RossTalk protocol.
- Update graphics in real-time with XPression's real-time 3D render engine
- Access expert creative, commissioning, training, programming and event support from Ross.

TOUCHDOWN

\*Note: Resolutions shown are only an example. And not a limitation of the control system or panel itself that can be driven from Ross Products.
