

# streamline

## ASSET AND ORDER MANAGEMENT

Streamline Graphics is designed to work alongside your XPression motion graphics workflow to organize asset requests, search existing assets and easily add them to on-air graphics.

## Features/Benefits

- Make the most of your existing image and video assets by creating searchable metadata.
- Use the Work Order management system to request new assets, provide feedback on new assets and track progress.
- Streamline Graphics is integrated into the XPression MOS plugin. Browse existing assets or request new assets directly from the NRCS, then drag and drop the asset into the XPression template.

# IBC Highlights

## **VERSION 4 NOW AVAILABLE**

Check out the newest features added in V4 including the ability to manage asset files in multiple locations, a revamped reporting tool, system health and SNMP alerts, visibility and edit permissions tied to folders, and more!

## **STREAMLINE.CLOUD**

The power of Streamline is now available in the cloud! In addition to the traditional purchase model, Streamline is now available as a monthly or annual subscription. Software and upgrades are hosted and managed by Ross Video.

## **STREAMLINE ENTERPRISE**

Streamline Graphics can scale to fit any size production with the release of Streamline Enterprise. Take graphics asset management to the next level with scalable architecture to support hundreds of concurrent users, robust redundancy and flexible server requirements.
