Trackless virtual systems are all-in-one engines that require no external action on the part of the camera in order to create movement.

## Features/Benefits

- An all-in-one virtual production tool.
- Uses stationary cameras so tracking hardware or software is not required.
- Real 3D virtual sets with full 3D motion capabilities.
- Transitions between camera positions or between multiple cameras to show movement.

# IBC Highlights

## **LOOKS REAL**

Combining virtual camera moves and the same high-quality virtual sets as tracked implementations creates excellent productions.

## **SHORTENED LEARNING CURVE**

Leverages years of experience with virtual sets and augmented reality to bring quality virtual sets to even the most basic productions.

## **DON'T LOOK SMALL**

All camera moves are done virtually inside of the XPression scene, eliminating the need for a large studio space.
