

VIRTUAL STUDIO

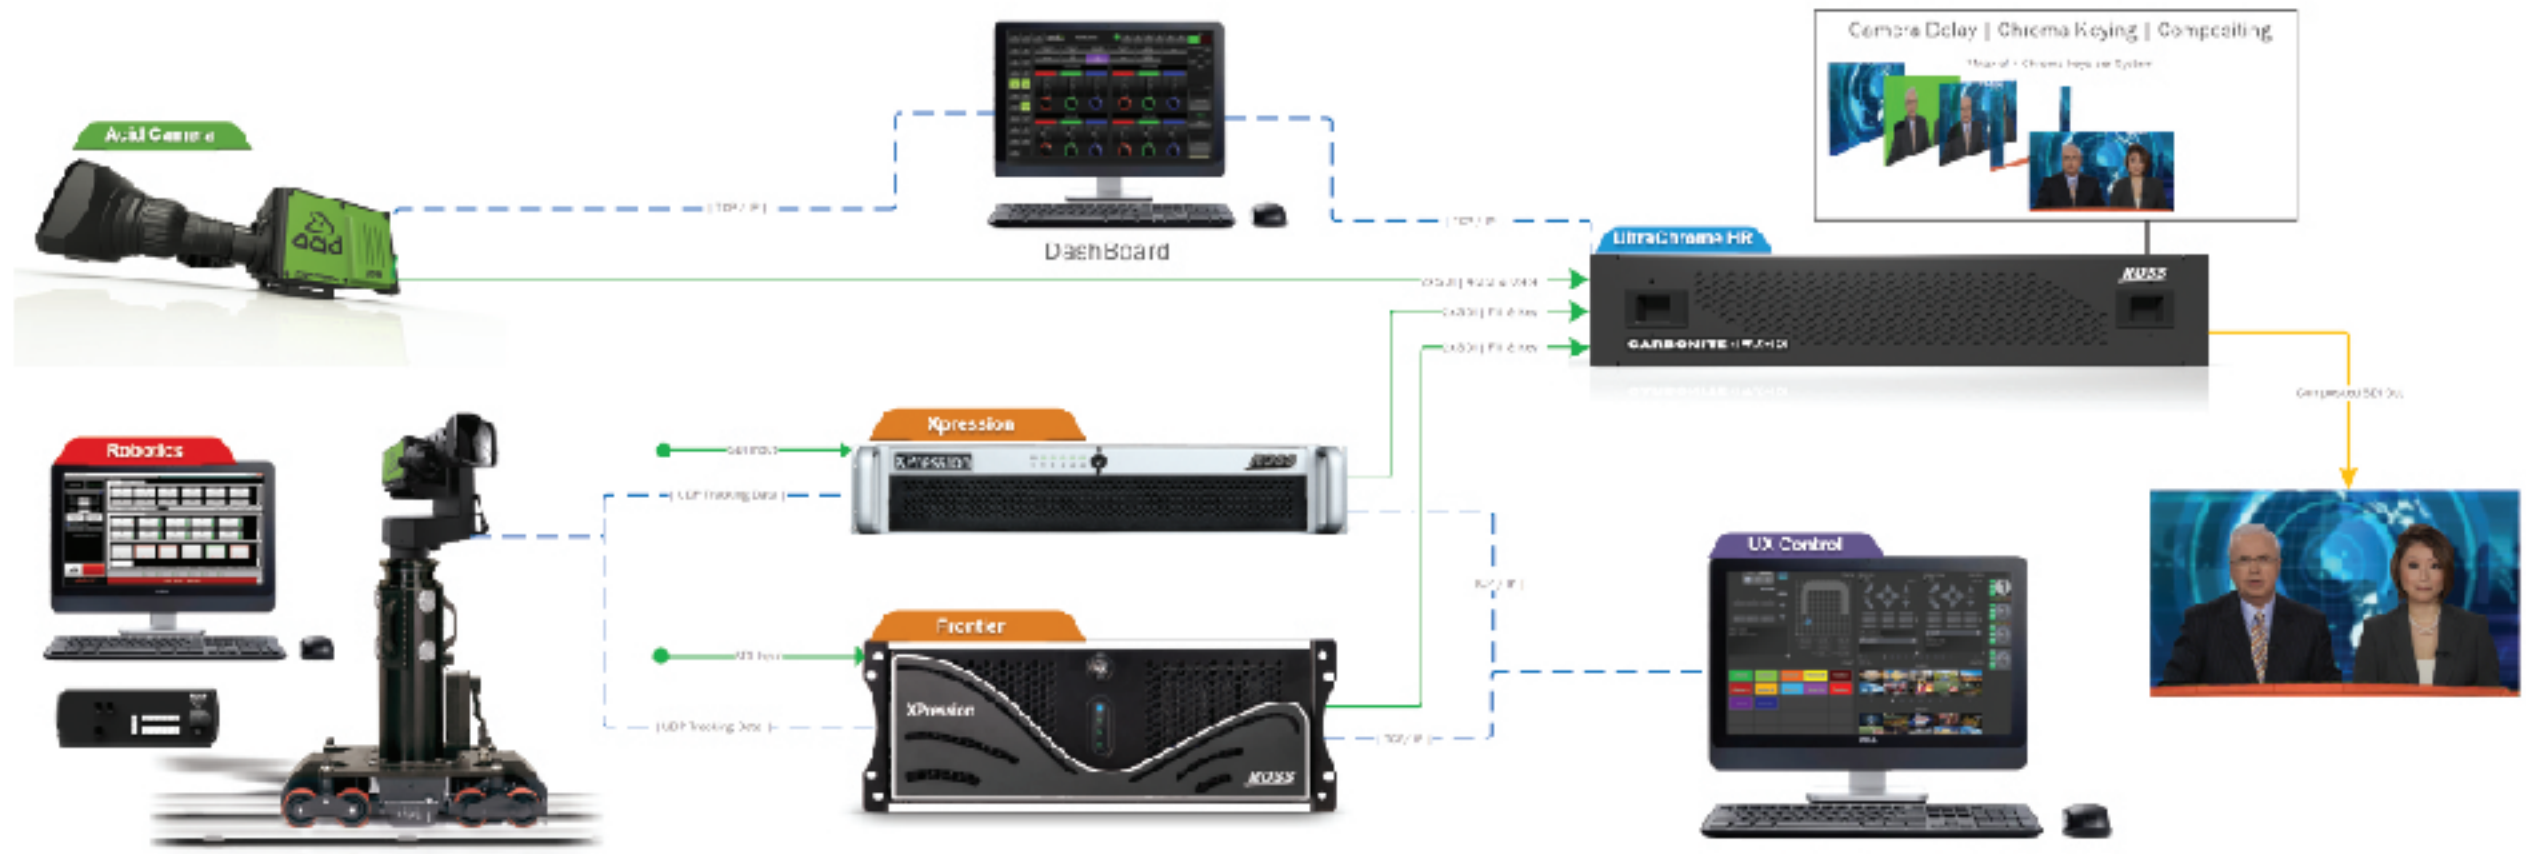

Virtual studios and augmented reality offer the dual promise of improved audience experience with increased engagement, at a fraction of the cost of traditional physical sets.

Features/Benefits

- Extend the story telling tool set with multiple virtual monitors, floating augmented reality elements, and customizable virtual sets.
- Present information in new and innovative ways to captivate and inform audiences.
- Operate and deploy virtual solutions in small spaces that require substantially less facility costs.
- Get viewers to tune in longer by showing segments with captivating content such as augmented reality weather.
