# GOVERNMENT LEGISLATURE

REALIZE OPEN GOVERNMENT
Broadcast technology is increasingly being used by national agencies, state governments, and local communities to make information more accessible to constituents. City, state and national governments require different levels of scalability. Ross has a cost-effective solution for every size.

Produce efficiently, accurately and flexibly
Make training staff and getting on air quick and easy with a seamlessly integrated solution from Ross. Control cameras, graphics, and switching all from a responsive and intuitive user interface.
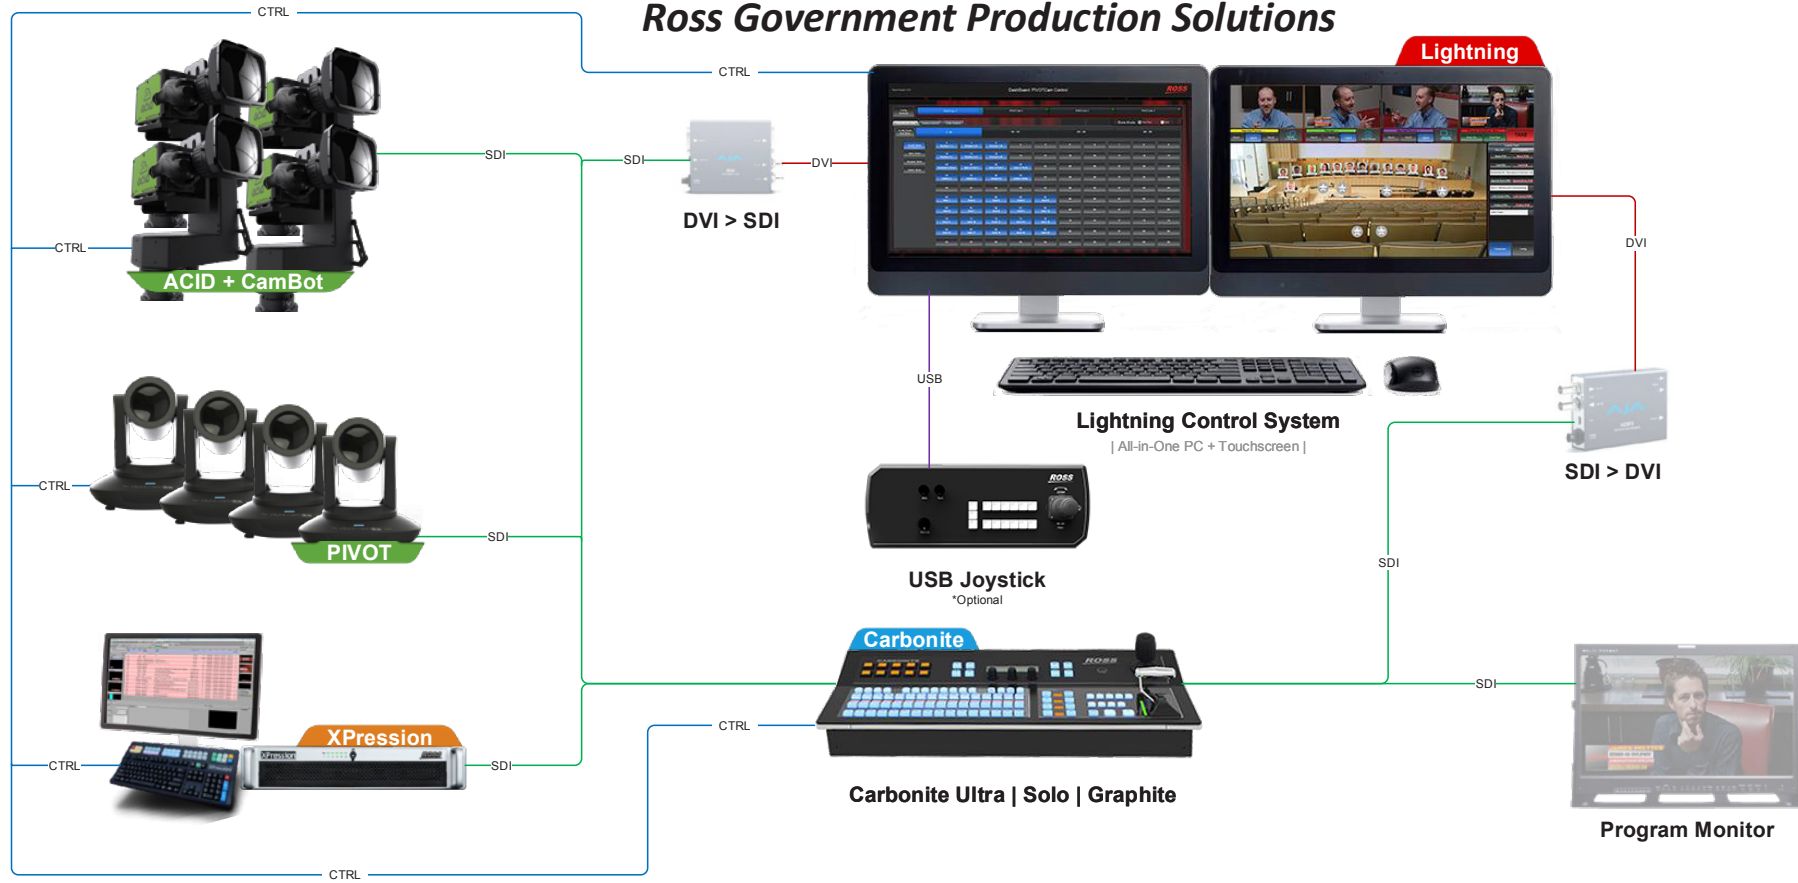

Maximize budget
Single user workflows allow for coverage of more committee meetings and assemblies making sure nothing gets missed because of operational budgets or staffing limitations.

Choose a proven solution
By choosing Ross you'll be in good company. Ross provides the technology that legislatures all over the world rely on.
