 IP & SDP WORKFLOWS

Ultrix 12G Router is the ultimate routing, MultiViewer, and signal processing platform for Studios, OB Vans, and Flypacks.

## Features/Benefits

- Easily add new features through additional software licenses. No additional hardware required.
- The Ultrix 12G Router is infrastructure in a box. Video/audio routing, MultiViewers, audio processing, frame synchronizers, clean/quiet switching, UHD gearboxing and more all unified in one single chassis.
- Because of its size, base feature set, and software capabilities, owners save significant money on upfront capital costs. Additionally, the advanced architecture provides significant ROI in terms of power, cooling, shipping, and space costs.

# **HiGH** **IMPACT** **EFFICIENCY**

SOFTWARE-DEFINED ROUTING, MULTI-VIEWING & PROCESSING IN A BOX

DRAMATICALLY REDUCED COST, POWER, WEIGHT AND SPACE

HIGHLIGHTS

## **ULTRIX-IP-IO**

The new Ultrix-IP-IO Blade enables seamless transition to scalable and distributed IP networks with high-density, long-reach 25G ethernet connectivity.

## **ULTRICORE BCS**

Ultricore BCS is an advanced standalone system controller that delivers more scale, more power, and more capabilities, along with advanced license support for complex systems.

## **ULTRICORE IP**

Ultricore IP simplifies the IP transition by allowing users to use the same workflows regardless of transport. Same logical configuration, same control surfaces, same operator confidence.
