 IP & SDP WORKFLOWS

Acuity is the top-of-the-line large production switcher designed to handle the world's most challenging live events.

Features/Benefits

- Up to 8 MEs with loads of keying power for maximum video processing capability in UHD and HD.
- MultiFeed provides huge configurable output capability with 6 Program and 2 Preview outputs on a single ME.
- Powerful MultiViewers can monitor 200 discrete video buses across up to 14 heads.
- Specialized I/O cards for total I/O processing - including frame syncs, format conversion, proc amps and SDR/HDR conversion.

HiGH **IMPACT** **EFFICIENCY**

UHD, 12G, HDR WITH 8 MES IN 4RU OR 8RU

LARGE AND CHALLENGING PRODUCTIONS MADE SIMPLE

HIGHLIGHTS

LIVE EVENT MASTERY

Acuity's immense switcher resources and unmatched device control of both Ross and third-party products have placed it at the core of the world's most awe-inspiring stadium productions.

DOUBLEDOWN EFFICIENCY

DoubleDown panels are a premium Acuity option that doubles the number of key/aux bus assignment buttons for every ME row. This greatly accelerates operation of large I/O workflows in a fast-paced production, where shift functions to access mapped sources are undesirable.

12G MULTIPROCESSING CARDS

This module makes HD-to-UHD migration simple with hybrid 3G/12G connectivity, full HDR/WCG support, complete video processing resources, and additional monitoring.
