Compact and affordable, the Carbonite Black Solo 1ME production switcher is built with the tools to create a top-notch show - wherever you take it!

## Features/Benefits

- 9 IN / 6 OUT or 13 IN / 6 OUT for small-scale productions.
- Main ME with major effects and keying power, along with 2 built-in MiniMEs for additional production resources.
- Internal video processing and monitoring tools to reduce external gear.
- Simple control with an ergonomic control panel, DashBoard software and ViewControl touchscreen.

# **HiGH** **IMPACT** **EFFICIENCY** **SMALL FOOTPRINT, BIG FEATURE SET** **BIG SWITCHER FLEXIBILITY**

## HIGHLIGHTS

### **USB MEDIA PLAYER**

Dedicated single-channel clip player built directly into the production switcher, for simple playout of video clips directly from a connected USB-media drive. There is no other production switcher in the world with this kind of built-in functionality.

### **BIG SWITCHER MACROS & MEMORIES**

Smaller switchers generally feature base-level custom controls and memories, but not Carbonite Black Solo. Employ fine-tuned custom control macros and a highly-customizable memory system for smooth recall of complex scenes and events.

### **THREE VERSATILE CONFIGURATIONS**

Available in an easily-transported all-in-one switcher, 1RU chassis with software control, or separate panel and chassis combo.
