 IP & SDP WORKFLOWS

DashBoard is a free and open platform from Ross Video for facility control and monitoring that enables users to quickly build unique, tailored CustomPanels that make complex operations simple.

Features/Benefits

- The Emmy® award winning openGear platform is designed to work with DashBoard as the front end user interface for the more than 100 openGear partners using OGP (openGear Protocol).
- PanelBuilder is a powerful tool used for creating custom interfaces for production needs with control over openGear and DashBoard connect products, IP controlled devices via custom commands and Ross products like XPression and Carbonite.
- Download DashBoard for free to start building panels and monitoring your openGear devices.

HIGHLIGHTS

XPRESSION PLUG-IN

With an XPression API license, XPression now appears as a native device within DashBoard. This makes XPression graphics and published fields viewable and modifiable right in DashBoard along with thumbnail preview for each item.

ULTRITOUCH SUPPORT

DashBoard now features support for the amazing Ultritouch 2RU control surface that brings a new user experience to DashBoard and DashBoard CustomPanels.

NDI VIDEO STREAMING

DashBoard now features improvements to NewTek's NDI™ Video Streaming for monitoring live video directly in DashBoard and on Ultritouch.
