

HOUSE OF WORSHIP

BUILD YOUR SPIRITUAL COMMUNITY

The modern world of worship leverages the use of technology for spiritual purposes. Large and small venues are incorporating IMAG, online, and multi-campus productions to reach a broader believer-base cost-effectively.

Amplify your spiritual message

Display and update pertinent speaker and sermon details including passages and hymns in real-time, or bring in remote guest speakers from across the globe. Using video production and social media tools, combined with broadcast-quality, dynamic graphics and interactive content, you will be able to create the ultimate worshiper experience.

Reach a wider congregation

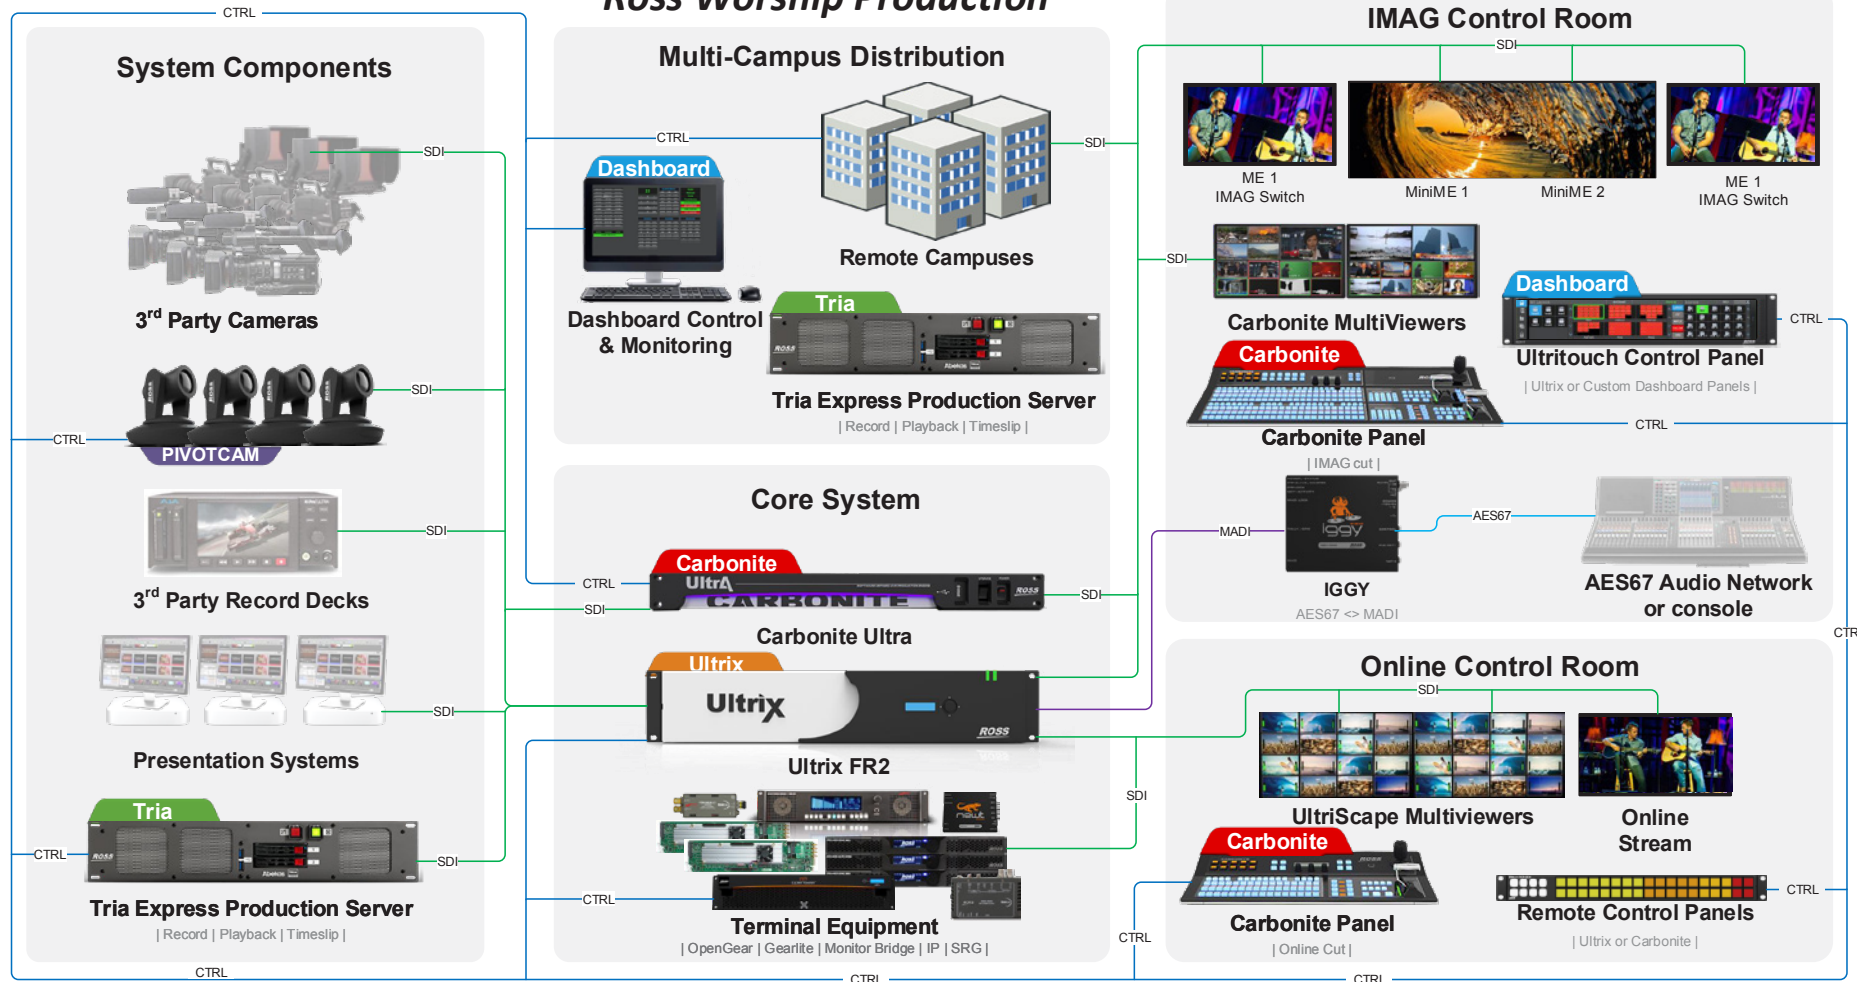

Reach local and remote believers including adjoining rooms and satellite campuses easily and effectively.

Make it easy

The Ross House of Worship production solution with unified device control is easy to set up and intuitive to use. Realize expert productions from your volunteer community.

Ross Worship Production

Carbonite

- > Multiple Frame and Panel sizes Including software control with Dashboard
- > Up to 3 Control surfaces per frame
- > Software upgradeable ME's, Frame Syncs, and Multiviewers
- > Powerful Custom Controls for executing complex production elements seamlessly
