 IP & SDP WORKFLOWS

Ultriscape is a high-performance software enabled MultiViewer option on the Ultrix Connectivity platform, perfect for Studios, OB Vans, and Fly-packs.

Features/Benefits

- Ultriscape is low latency and extremely high quality and is designed for the most demanding applications.
- Easily add new MultiViewer outputs through additional software licenses.
- Each MultiViewer head is completely independent and supports 100 PIPs per head, offering tremendous flexibility for layouts and control.
- Ultriscape is an integrated MultiViewer within the Ultrix platform, offering extensive audio and video signal processing that works in Baseband, IP, and hybrid environments.

HiGH **IMPACT** **EFFICIENCY**

INTEGRATED MULTIVIEWER WITH ROUTING AND SIGNAL PROCESSING

27 HEADS WITH 100 PIPS PER HEAD IN 5RU

RICH MULTIVIEWER CAPABILITIES

Each MultiViewer head supports up to 100 pips. Completely independent and individually controllable providing superior flexibility.

INDUSTRY LEADING QUALITY

Pristine image quality, and low latency make Ultriscape ideal for the most demanding applications and venues.

INDUSTRY STANDARD CONTROL PROTOCOLS

Industry standard routing control and MultiViewer tally protocols means easy integration into automation systems as well as third-party router control systems.
