HIGHLIGHTS

V2.0 12G/UHD SWITCHER

Carbonite Ultra's latest software update unlocks 12G/UHD switcher functionality in 2ME & 3ME systems. Featuring 18 (12G) inputs, 10 (12G) outputs, up to 2 full MEs, 2 MiniMEs and a full set of production switcher features - Carbonite Ultra is the definitive 12G/UHD switcher for mid-size production applications.

V2.0 FEATURE IMPROVEMENTS

Carbonite Ultra's latest software update improves upon the core production switcher feature set with 1080P 60 format support and 2 additional chroma keys (for a total of 4).

SOFTWARE-DEFINED LIVE PRODUCTION ENGINE

Built on a ground-breaking foundation of new FPGA technology, Carbonite Ultra allows for new features and exciting software-defined functionalities entirely via software. Customers can expect an ever-improving product for years to come.
