

## **DEVELOP FUTURE PRODUCTION ROCKSTARS**

Teaching with industry-leading tools from Ross provides students with the foundation needed to become top industry operators.

### **Teach production workflow**

Technology has enabled whole new ways of producing and delivering television and Ross can help modernize your curriculum to ground students in traditional methods while expanding their knowledge into new areas like automated production, augmented reality and social media.

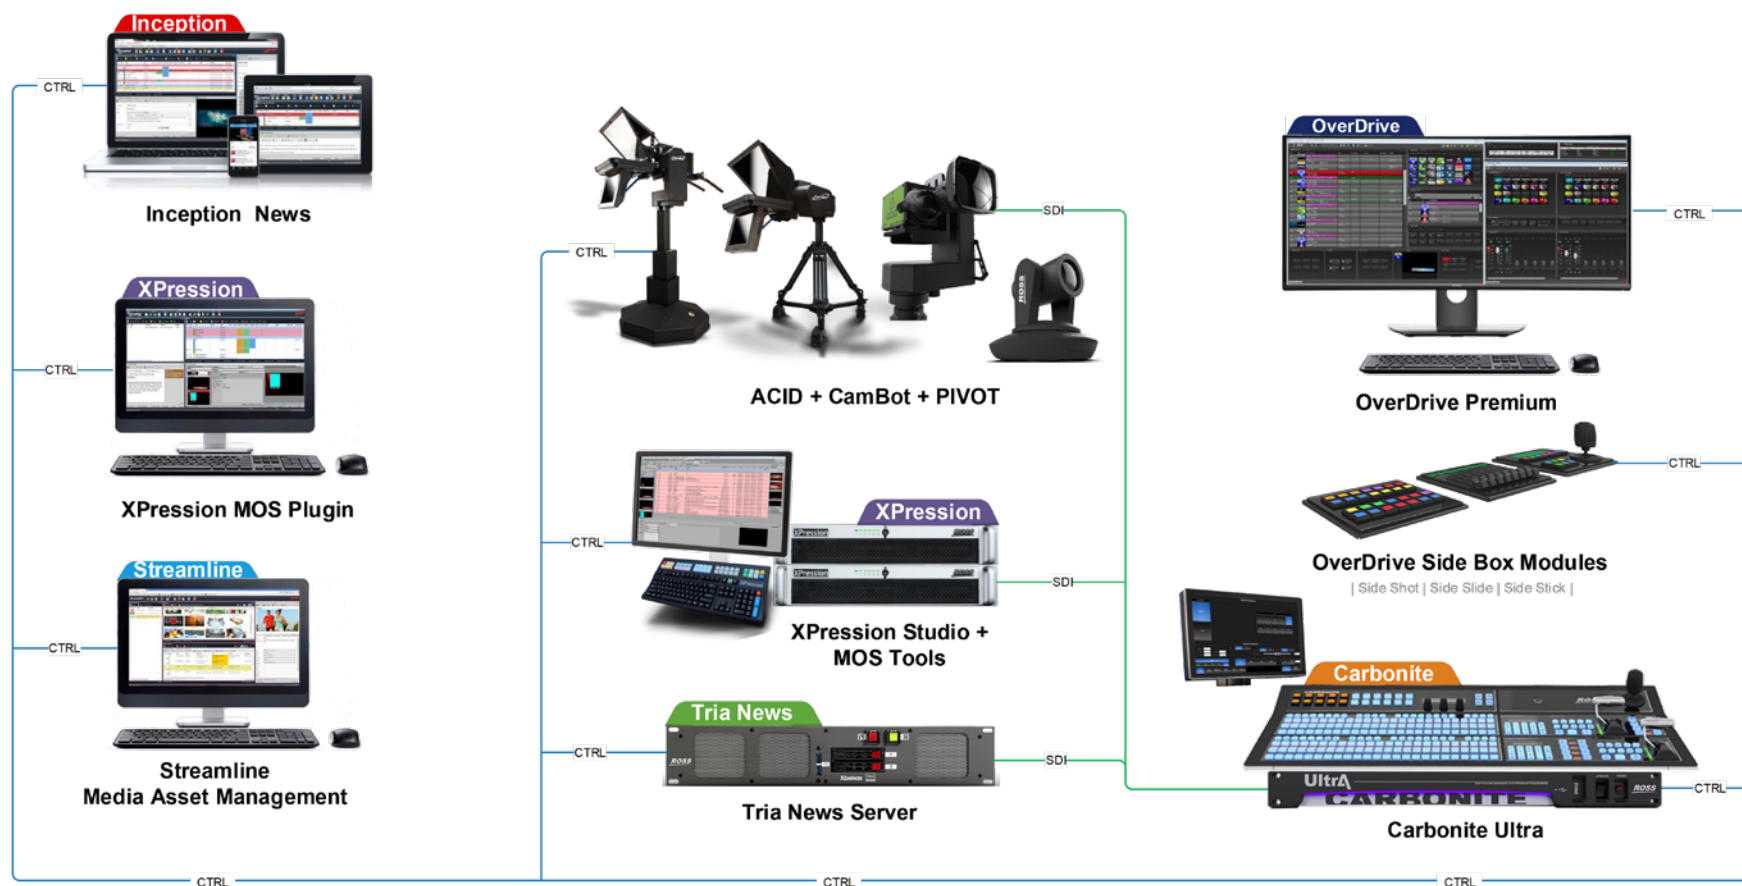

### **Invest in flexibility**

Easily transform a control room to suit different types of productions - from news to sports to live auditorium productions and everything in between.

### **Scale your solution**

Ross has a deep portfolio of products, enabling you to start small and add equipment as the educational program grows.

## OVERDRIVE

### Automated Production Control

- Control all devices for flawless production execution
- Full MOS support
- Control both Ross and 3<sup>rd</sup> party devices

## STREAMLINE

### Asset Management System

- Organize assets for graphics and for video production
- Browser based - access everywhere
- Local and cloud hosted options available
- Work Order Management available for Graphics workflows
- Placeholders available for Graphics and Production workflows
- Integrates with XPression, Tria News and Inception

## INCEPTION

### News Computer System

- Browser based interface
- Story-centric workflow supported for digital content and MOS integrated linear productions
- Curate content from and publish content to digital and social media platforms
- Integrates with teleprompters, XPression, Streamline, Tria News and OverDrive
- Locally hosted or Cloud hosted options available

## XPRESSION

### Real-time 3D Motion Graphics

- Designer friendly easily building complicated graphics
- Easy to use and operate
- Full MOS integration
- Software-defined to add channels and features as needed

## TRIA NEWS

### News Playout Server

- Multiple codec support
- MOS compliant when paired with Streamline
- 1 input and 4 outputs
- Integrates with SAN storage

## CARBONITE

### Production Switcher

- Highly popular mid sized production switcher
- Easy to learn and operate
- Big switcher power at a fraction of the price
- Robust hardware with multiple panel and frame options
