 EDUCATION

Streamline Graphics is designed to work alongside your XPression motion graphics workflow to organize asset requests, search existing assets and easily add them to on-air graphics.

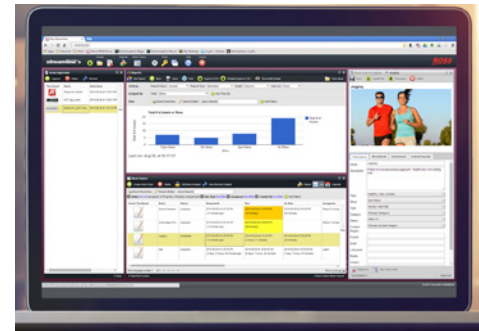

Features/Benefits

- Make the most of your existing image and video assets by creating searchable metadata.
- Use the Work Order management system for a unified process to request new assets, provide feedback and track progress.
- Streamline Graphics is integrated into the XPression MOS plugin. Browse existing assets or request new assets directly from the NRCS, then drag and drop the asset into the XPression template.

HIGHLIGHTS

STREAMLINE GRAPHICS V4.2

Streamline Graphics v4.2 is releasing at NAB with expanded support for XMP metadata workflows.

IMPORT & CONFIGURE XMP METADATA

This new release makes it easier to import and configure XMP metadata and allows users to edit the metadata and write it back to a file.

IMPROVED ACCESSIBILITY & ACCURACY

With this improved workflow, Streamline Graphics now creates more accessible and accurate metadata for use with XPression Visual Logic.
