

# PIERO SPORTS GRAPHICS

Version 13.4  
Release Notes

## What's New

**NEW EFFECT - Player Glow/Grow:** Change the size of players and make them glow and pulse to focus attention on them. This effect replaces the Player Glow effect, keeping some of the same functionality whilst adding the ability to enlarge the player.

**Removeable Players selection process:** With the “Invert selection” option it is now possible to hide a player by clicking on them. Invert selection is on by default. When “Invert selection” is not used, clicking on the first player hides everyone but that player, then clicking on hidden players will make them visible again.

**RGB Keyer properties:** With clearer properties it is now easier to use the RGB keyer to its full potential than ever before. Use the properties to fine tune your colour selection and improve the quality of your key.

**New – Opta Data Rugby Module:**

Bringing the power of Opta data visualisation to rugby. Show available Opta data using Piero graphics to bring its meaning to life. You will need access to Opta's Rugby data feeds. If interested, please enquire at [pierosupport@redbeemedia.com](mailto:pierosupport@redbeemedia.com)

**SportsCode XML:** When exporting video with XML from SportsCode for work in Piero, you can now choose from standard XML or Final Cut Pro XML. Piero supports both for import and export.

**Timeline zoom and other options:** Many of you have requested the ability to zoom in and out on the timeline to help navigation. Use the plus and minus buttons in the bottom-left corner of the interface to change the scale of the timeline. Note the new trashcan icon next to them allowing you to delete the selected effect. The up and down arrows move the selected effect up or down the timeline. Clear will remove all items from the timeline.

## Improvements

|             |  |
|-------------|--|
| Launcher    | Video format resets when changing modes (e.g. Analysis+Live to file mode). |
| Opta Module | Reenabled AFC Champions League access.                                     |
| Pause       | Set the default length of pauses.  |
