

PIERO SPORTS GRAPHICS

Version 13.8
Release Notes

What's New

Team Line Up (light): Simplicity has come to the Team Line Up effect with a new “light” version. Use it in combination with the Virtual Stadium, Tactical Board or over video to create the look you want. Camera movements are now controlled externally by the Virtual Camera or Spline Camera. Explore new possibilities with the addition of new player types and transitions along with new text positions. Only one team is shown per line up effect.

Improvements

Calibration	Record the calibration when you are “On Air” or in edit mode.
Dynamic Formation	Renaming “custom tracks” now possible
User Model Effect	<u>Now available in all sports</u>
One Click Calibration	Now available in tennis and hurling

Bug Fixes

Measurement Table	<u>Wings now display correctly</u>
