

What's New

Touch Presets

Touch presets can now be accessed as buttons directly in both PIERO Remote Touch and PIERO Remote 2.

Any presets you have created in Touch mode in PIERO are now available to add as individual buttons in both PIERO Remote Touch and PIERO Remote 2. Simply ensure PIERO Remote Touch/PIERO Remote 2 is connected to PIERO, then select the preset you want to add to the list of effects a user can choose. It is now possible to create as many Marker styles as necessary.

PIERO Remote Touch for Mac

Piero Remote Touch is now available to download for Mac.

If you are a PIERO Club user, you can now install PIERO Club and PIERO Remote Touch on the same Mac, helping you streamline your presentations and reduce the number of computers needed when travelling and presenting.

Improvements

AMP Protocol	AMP Protocol added for PIERO to remote control VTR functions of Evertz Dreamcatcher
Canadian Football	Canadian Football League calibration added to the American Football sport module.
File Mode	Using the latest version of MainConcept; providing greater stability and performance when working with video files.
General	Stability improvements
Opta Data Module	New competitions added. Soccer: Ligue 2, Women's World Cup. Rugby Union: Pro 14, World Cup, U20 World Cup.
STATS Data Module	STATS Data Module now available on Mac
Softball	Softball calibration now available in the Baseball sport module
Tactical Board	Oval Tactical Board available for AFL
User Interface	The user interface now scales to fit screen resolutions greater than 1920x1080. 3D Player Utility starts in windowed format. Improved the consistency of the user interface and icons used throughout PIERO
Team Lineup	Undo mechanism improved for Touch workflow

Bug Fixes

3D Player Utility	Fixed bugs causing parts of the user interface to display incorrectly. Better accents support for team batch import.
Opta Data Module	AFC Champions League competition reenabled. Stability improvements
PIERO Club	Fixed a bug in the Mac version causing effects buttons to be duplicated.
Sound Effects	Sound effects internal to the Freehand Arrow now get embedded on export/playout
STATS Data Module	Fixed issues causing some home runs not to be categorised correctly and some missing players and data
System	Fixed timecode inconsistencies between PIERO Broadcast systems using AJA and DVS video acquisition cards.
Team Line-up	Images with transparent areas now display correctly when moved in front of one another. Tooltips corrected for Line Up Home and Away buttons in Touch mode. Undo now works correctly in Touch
Test Tool	Test Tool now works on PIERO Broadcast systems with AJA video acquisition cards
Tracks	Fixed a bug causing the beginning of tracking effects, when added in the middle of a Pause, to jump to the beginning of the Pause
Touch	Fixed an issue causing the video to jump when Play/Pause is pressed
