

BACH openModule

CUSTOMER:

YellowTec

CUSTOMER PROFILE:

Supplier of intuitive easy to use audio products, including recording microphones, desktop mixers and USB audio interface devices.

THE CHALLENGE:

- Address more markets with support for LW+, Ravenna, Ember+
- Need small port count AES67 solution with open control
- Replace expensive AES67 partner box w/ solution that supports MAD1

ROSS IS PROVIDING:

- Market-ready openModule
- Fully compliant AES67/ 2110 solution
- System integration and validation service
- Customization service for new features
- End-to-end portfolio w/ low ch.SoC

SUCCESS:

- openModule supporting LW+, Ember+, Ravenna
- SDK for quick integration of their control software
- MAD1 to AES67 bridge for easy integration into their existing product
- A roadmap to update the rest of their portfolio with Minuet
