

Installing DashBoard Beta on OS X

Installing on a Computer Running Apple® Mac® OS® X

Use the following procedure to install DashBoard on a computer running Apple® Mac® OS® X:

1. You must have administrator privileges
2. If running OS X 10.8, you must allow applications downloaded from “Anywhere”
(<http://support.apple.com/kb/ht5290>)
3. Install by running DB6_setup_OSX_embedded_java.pkg
