

Panel Inserts for Carbonite Ultra

CB3X
CB3S
CB2S
CB1S

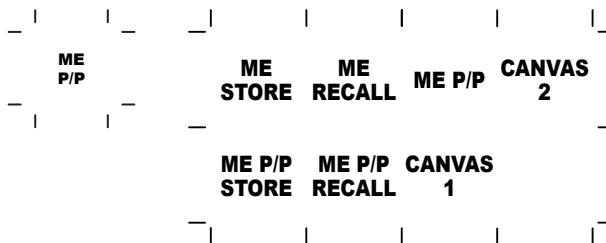

NOTE: Only the CB3X has the **ME P/P** user button on the panel rows.

CB2
CB1

The Carbonite Black control panel is supported by the CUF-124 frame. To access some of the features found in Ultra, you must change the inserts in your existing control panel.

The new inserts identify the source buttons that are used to select ME P/P or a Canvas when performing a memory recall/store, or assigning the panel row to ME P/P or a Canvas.

Print this page out on a clear lexan and cut out the inserts shown above. Ensure that you print the page at Actual Size to ensure the inserts are the proper size.
